CONTRACTORS LUMBER SUPPLY
SEATTLE, CO. WASH.

OUR GUARANTEE

WE GUARANTEE that each and every article in this catalogue is exactly as described and represented, and if not so found, any money you may have paid will be promptly and cheerfully refunded. We expect and want you to notify us without delay, of any article purchased that does not come up to your expectations. You will always find us ready and anxious to make a satisfactory adjustment.

WE GUARANTEE absolutely, that we will furnish for each and every order for any house or barn design shown in this book, at the price quoted, sufficient material to build the house or barn in a good, substantial and workmanlike manner, strictly according to the Blue Print Plans, Specifications, and material list furnished by us. That all material furnished will be strictly up to grade in quality and sizes as described in our general specifications on pages 8 and 9.

WE GUARANTEE to furnish with each order for any of our house or barn designs, full directions in the shape of an itemized list of materials, showing exactly the number of pieces, number of feet, size and grade of the material furnished, designating the purpose for, and the place in which it is to be used in the building. If anything is short, notify us at once, and we will make the shortage good immediately, or authorize you to purchase it locally at our expense.

WE GUARANTEE safe delivery, and to replace any item that may be damaged in transit, or to refund the price of such item, on receipt of the paid freight expense bill with a notation by the freight agent showing the condition of material on arrival.

AND LAST BUT NOT LEAST We guarantee as quick shipment and prompt delivery as can be offered by any other concern on the Pacific Coast. For years we have been making a specialty of rapid deliveries and our facilities in this respect are unexcelled.

OUR MOTTO To supply our customers with material and service of such high quality that absolutely every house sold by us shall be undeniable evidence of our more-than-fair business methods, and mark a step forward in the building of beauty and comfort into the homes of those we serve. For it is upon the broad principles of THE ABSOLUTE SATISFACTION of our customers that we create a lasting business, and finally prove by actual results that our business is founded on SQUARE DEALING.

CONTRACTORS LUMBER SUPPLY CO.

J. W. SUMRALL,

Secretary-Treasurer.

THE ABOVE GUARANTEE IS AS GOOD AS A GOLD BOND

If there is any question in your mind as to its value, we gladly refer you, by special permission, to our Bankers:

One of the largest and oldest banks in Seattle; and with whom we have been doing business for a number of years. WRITE TO THEM.

BETTER MATERIAL--BETTER SERVICE --LOWER PRICES

Cutting Out the Big Profits

SELLING lumber and building material direct to consumer is a business that has come to stay, just as surely as the Telephone and Automobile have become fixed in our daily life. The only wonder is that broad-minded business men did not see the need of this *Mill-To-Consumer* plan long before they did. But as in every other line of business growth, it was the everlasting abuses of the old selling plan—profit on top of profit—that finally was to bring a better day for the contractor, the carpenter and home-builder who have been the victims of greed and profiteering.

It was simply impossible for the old business methods to go on without opposition. The consumer had rights that no longer could be ignored; and this opened the door for the young, eager business man who could conceive of an organization that would pay a living profit to itself, and at the same time give the consumer the utmost value for his money.

Filling a Great Need

That was what the present owners of this company faced ten years ago; it was a hard struggle at first, the idea was new and it was hard to get our plans clearly before the people. But when once we sold a house in a community, both the house and owner were boosters for us thereafter. Even at that early date the local manager of a lumber yard, seeing that our material was better than what he had been selling, exclaimed: "*Where do they get such lumber? We can't get it.*" So within less than twelve months our office was literally swamped with inquiries from interested builders in every nook and corner of the country. All this was positive proof of one thing: the average man was alive to any real chance to save money.

Success Against Opposition

While every mail was bringing us letters and inquiries by the hundred, we suddenly found ourselves assailed from every side by the powerful retail lumber organizations whose easy profits were threatened

by our "*Better material for less money*" plan. But we have shown that lower prices and better materials are stronger arguments with the purchaser than anything the opposition might say or do against us. And we have succeeded because we have been able to give our customers a service that speaks louder than mere words. Today we can refer you to thousands of satisfied customers who have benefited through our service and prices.

The Proposition Boiled Down

Our whole proposition is based upon
**BETTER MATERIAL
BETTER SERVICE
LOWER PRICES**

Upon these principles we have built up a great organization that is placing thousands of homes, barns, churches and schools throughout every state west of Lake Michigan and from Canada to Mexico; an organization that gives every home-builder not only the advantages outlined below, but many more besides:

1. A home planned by the best architectural skill that money will hire.
2. Comfort, beauty and convenience combined in a way that makes home-building an exact science.
3. Materials absolutely up to grade—not a low grade sold as a higher grade, as so often is the case. We guarantee our materials because we know they are up to grade.
4. Prices from \$200.00 to \$500.00 less than you would pay locally.
5. Absolutely without cost to you, our architects' complete working plans and blue prints, together with exact directions covering itemized list of all material, piece by piece, number of feet, exact size and grade, showing for just what part of building it is used.
6. Standard construction throughout, as our plans clearly show. We could cut down the cost in many ways without altering the appearance of the building, but most people build only once in a lifetime and they prefer the best.
7. An ironclad guarantee that our quoted price will cover every item however small, protecting absolutely against any extras.

CONTRACTORS LUMBER SUPPLY COMPANY, SEATTLE, WASH.

Three Reasons for Our Low Prices

LOWER SELLING COST

The consumer always pays the cost of selling. Therefore, the less it costs to sell an article, the less that article should cost the consumer. Look, then, at the big overhead expense of the local lumber yard where the territory is necessarily limited: investment in real estate, sheds, stocks, taxes, insurance, interest on money, salary of manager all the year and extra help in busy periods; also expense of unloading lumber, hauling to retail shed, sorting it out and stacking it up again. Now add the retail man's profit on top of this and you pay the bill.

Compared to this big expense of the local yard, our selling cost is a mere trifle; for at a comparatively trivial expense we are reaching almost every prospective home-builder west of Chicago and St. Louis. We sell almost wholly by advertising, and this has a cumulative value that actually reduces our selling cost month by month. The good will of our former customers alone would bring us thousands of dollars worth of business every year even if we did not spend a cent in expanding our territory. Therefore, it is plain that as the volume of our business increases every year—almost without extra expense to us—there is a corresponding

decrease in the actual cost of our materials delivered to the consumer.

SMALL PROFITS

Likewise, if we were doing only a small business here and there, or operating within limited territory as is the case with the local yards, it would be impossible for us to continue business with the small profit we now make on a car load of material. That is why the local yards cannot meet our prices without actually losing money. But you may be sure they lose no money. They might meet our prices once in a while on an order just to keep our materials out of their territory, but they make up that very loss on other sales *by adding in extras and mixing in old stock that is sun-checked and.. of lower grades.*

ECONOMY IN HANDLING

We are located in the very heart of the greatest timber section in America, where the facilities for manufacturing and shipping lumber are unsurpassed. Every modern convenience is used in manufacturing our materials, conveying them from the mills into the cars and getting them on their way at the least possible expense. It is a fact that we can deliver at your station, many items of material for less than it would cost the retail yard, for we ship at car load rates many things that the yards get by local freight.

Satisfied Customers the Best Proof

ALL that we might say about our materials, service and prices would hardly convince many people of our straightforward methods of doing business. Nor do we ask that they take our word unsupported. For we have in our files hundreds of letters from satisfied customers who have volunteered to tell us that our home-building-method has saved them money and time. The following letters are taken at random from our files. Others will be found elsewhere in this catalog; and we would be pleased at any time to submit to prospective customers the name and address of those who have bought from us within the last few months or weeks:

Powell, Wyo.,
June 12, 1920.

C. L. S. Co.,
Seattle.

Gentlemen: The car of lumber came through in record-breaking time, I think, and got here nearly two weeks before I expected it. I am well satisfied with the quality of material. The lumber runs far better than I could have got from the local yard. I am, therefore, mighty well pleased with it.

Yours truly,

JOHN HENDRICK.

Lucas, S. D.
Dec. 29, 1919.

Contractors Lbr. Sup. Co.,
Seattle, Wash.

Dear Sirs: Am more than satisfied with the lumber which I got from you. The carpenters claim better lumber could not be found. I saved about \$500.00 on this one lumber bill. I expect to build a big barn next year. If so, will get the lumber from you.

Yours truly,

M. C. BENTER.

Craig, Colo.
April 19, 1920.

C. L. S.

Dear Sirs: I am sending for a sketch of house which I want you to draw a set of plans from. I built one house out of your lumber. House Design No. 653, the Pocatello, and it was fine lumber. Built it for Fred Amstutz, at Wellfleet, Neb., and also worked on church at Elsie, Neb., which was ideal.

Yours respt.,

JOHN W. McMILLEN.

QUICK DELIVERY

NATURALLY before giving us an order, you want to know how soon we deliver the material to your station. For years we have had the reputation of making quicker deliveries than almost any other concern in our line of business. We are in a position to load your material and send it forward within from five to fifteen days after your order reaches us. Records show that cars loaded with lumber will go through to points west of the Mississippi River within from fifteen to twenty days after leaving Seattle. A careful examination of our own records show that all of our shipments have reached destination within less than an average of thirty days after receipt of orders by us.

Car Load Shipments Only

Our money-saving prices are based upon car load shipments. This is another fortunate thing for the home-builder, because the average house of five rooms or larger, makes a car load; also a barn 30x40 or larger will make a car load, and entitle the purchaser to the advantage of a big saving in freight cost. Any bill that is too much for one big car will always make two minimum car loads.

When a bill of material is not enough for a small car load, several of our customers at the same point often bunch all their small orders together in one car, thereby getting the benefit of car load prices, even though each order is much less than a car load. In filling these orders we carefully separate each man's materials in the car, so that in unloading there is no confusion whatever.

Less Than Car Load Shipments

Certain items of mill work can be shipped to advantage in less than car load lots; but on such bills special delivered quotations should first be obtained. Send us a list specifying such items and we will quote our free delivered price.

Materials to Special Order

If you do not find in our catalogue the designs you want, send us your plans, blue prints or drawings, and we will promptly quote you our low special price; for we make a specialty of detail work of all kinds; our splendid facilities enable us to fill orders for odd sizes and special designs in quicker time than most concerns require to ship stock material.

Shipping Facilities

Our location is ideal. Being stationed on five transcontinental railroads, we are able to route all shipments over the shortest line, and at the lowest rate. These roads carry our materials promptly and safely to every quarter of the country. Our own traffic department, expert in the details of transportation, freight rates and routes, has charge of all shipments from the time your order is received until it is delivered at your station. Every shipment is followed by telegraph. Thus we are enabled every day to know just how far the car has traveled, and to estimate almost exactly the date of its delivery at destination.

We Guarantee Safe Delivery

Our materials are packed and loaded with special care; it is a rare occasion that an article is damaged in transit; but we guarantee that in case any article is found to be damaged in any way, to replace it promptly, or pay for its purchase locally. All you need to do is to send us the paid freight receipt, *signed by the agent at your station*, with a notation made by the agent stating the condition of material on arrival at destination. This statement is our only protection against the railroad for claim for damages. In case of glass being broken, or other small damage, we usually authorize you to purchase the article locally and send us a receipted bill, deducting the amount when you pay us. However, a *prompt report should be made to us* of such damage on receipt of shipment.

OUR TERMS OF SALE

OUR terms are extremely liberal; they are intended to protect our customers in every sense of the word. We assume all the risk and make it easy for you to order. Following are three plans under which we supply our customers with materials. Take your choice of any one of the three:

No Money Down Plan

This is the plan under which many of our orders are filled, and the one we recommend. You do not pay anything until five days after the material arrives. This gives you an opportunity to unload the car, count and examine everything to your satisfaction, and see with your own eyes just what you are getting. The material will be shipped subject to your inspection and approval. We are willing to do this, for we know our materials are as good as can be had.

Just send along a full detail list of material you want; with it send a statement of your local banker that you have on deposit the money to cover the order, and that it will be paid within five days from receipt of material; provided the shipment is up to grade specified, correct in quantity and satisfactory in every way. On our order sheet you will find a plain form of *Bank Guarantee* which you can have your banker fill out and sign; send it with the order. This guarantee is a plain, simple business form; the kind that one business house always asks of another; it is simply to assure us that you want the material, and will be ready to pay for it if shipment is satisfactory to you and in accordance with what you ordered; it protects you also, and avoids delay in shipping. By dealing on this square basis we accumulate no bad accounts; it avoids waste and helps keep our prices down.

C. O. D. Plan

Some of our customers prefer to send a small cash payment with order without a bank guarantee. On receipt of your order together with a cash payment of 15 per cent of the amount of the bill, we will ship the material **CASH ON DELIVERY**. In this case we draw a draft on you with Bill of Lading attached, payable on arrival of material. Under this plan, you do not have a chance to unload the car before paying draft, but you are permitted to open the car and examine the material as much as can be done without actually unloading it. But our positive guarantee holds good just the same, and if material is not found as represented, you do not have to accept it, and all payments made will be refunded.

All Cash With Order Plan

Many people have been dealing with us for years; they know what our material is, and are familiar with our business methods. This plan is for the special benefit of such customers. On all orders sent with cash in full we will allow a special cash discount of 2 per cent. This means a further saving worth taking advantage of.

HOW TO ORDER

MAKING out an order is a very simple matter; it is particularly easy when written on one of our order sheets. There are many different grades of lumber and mill work; the use to which lumber is put very often determines what the grade shall be. But the grade should always be given if possible.

In ordering lumber state number of pieces, width, thickness and length (except in flooring, ceiling, siding and shiplap the number of pieces and length are not often given—only the number of feet, width and thickness—); and in Common Fir Boards it is customary to give only the number of feet wanted in most cases.

In ordering doors, windows and sash, give *width* first, next the *height*, and next the *thickness*. "Sash" means one piece. "Window" means two pieces—one upper sash and one lower sash.

The universal rule in ordering windows is to give the size of glass and the number of lights; for instance, 1 Window 24x28x1 $\frac{3}{8}$ -2Lts., means that the glass is 24 inches wide and 28 inches long, not counting the wood in which the glass is fastened; and that the wood is 1 $\frac{3}{8}$ inches thick. Always state whether plain rail or check rail.

But in ordering sash give the outside measure in feet and inches; that is, the outside measure of the wood in which the glass is fastened; thus, 1 Sash 2-10x1-5x1 $\frac{3}{8}$ means that the wood in which the glass is fastened is 2 feet and 10 inches wide by 1 foot and 5 inches long, and the wood itself is 1 $\frac{3}{8}$ inches thick. Give the number of lights you want each sash to be divided into, if any; and give a rough sketch showing how they are cut up or divided.

When ordering, always give *catalogue number*, if more than one size of the article is listed under that item or number.

To Contractors and Carpenters

Contractors and carpenters throughout the entire West and Middle West are finding our *better material for less money* a big help in landing contracts; also in making their customers satisfied. A close, careful comparison of our prices with the prices charged by retail dealers often causes customers to build without delay. You will be able to build them better homes for less cost to them and more profit to yourself. This we are proving to hundreds of contractors every year.

To Carpenters Who Work by the Day

Many carpenters who work by the day are taking advantage of our *low prices, better materials and better services*. With our complete plans and specifications, they are relieved of a big responsibility and hard work for which they would hardly have been paid a sufficient wage. Not only do we save the carpenter this extra trouble, but he in turn saves the home-builder by telling him about our *better material for less money plan*.

OUR PLAN BOOK

The sixty-nine houses shown in this book include the best representative designs of American architecture. They are the result of endless pains and the most careful thought on the part of our high-classed architects and practical builders. These experts have combed the country over for all that is up-to-date, all that adds beauty, comfort and convenience to the home.

Quiet refinement, high quality and reasonable price are the main ideas that run through this unusual selection of homes.

These houses are built to withstand the deepest snows, the coldest winds and the hardest rains. There is more value in one of these homes, for the money, than any you may design and build specially; for they are the result of concentrated effort and systematic handling of vast quantities of building materials at the minimum of overhead expense.

The prices of the houses in this plan book are not printed for the reason that prices are subject to fluctuate so frequently that printed prices are often out of date and confusing to the customer.

It is our aim to give our customers the lowest prices at all times. Write us for a special quotation on the house you want. The quotation will come back to you at once and with it will be sent complete specifications.

Our quotations always include freight paid by us to your station.

Our Plans Given Free

The most important step in starting to build a home is getting the plans and specifications. Don't overlook this—plans are absolutely necessary; and specifications are just as important.

The specifications show **WHAT THINGS** go into your home—the plans show **WHERE AND HOW** they go. How then are you to buy materials intelligently unless you know **WHAT THINGS** you are buying? And how shall you know what to buy unless you know **WHERE AND HOW** it goes?

Don't make the old, old mistake of trying to do without plans and specifications; it has caused a million heartaches, misunderstandings, disappointments and botched jobs. Get plans and specifications and you will have no unpleasant disagreement with your contractor or carpenter.

Remember this: **ONE FIVE ROOM HOUSE WITH BATH MAY BE MIGHTY EXPENSIVE AT \$2,000.00; AND ANOTHER FIVE ROOM HOUSE AND BATH OF EXACTLY THE SAME SIZE AND SHAPE MAY BE MIGHTY CHEAP AT \$4,000.00.** It is what goes into the house that counts—the plans and specifications determine that; you can't figure cost any other way.

Our plans and specifications are given **FREE OF COST** with every house in this book; and with these plans and specifications we are able to figure out exactly a **CERTAIN HOUSE** at exactly a **CERTAIN PRICE**, because we know the quality and price of every single piece of material that goes into a house. Architecture is not guesswork; it is an exact science.

This free plan service consists of the following important items:

Basement Plan	Right Side Elevation
First Floor Plan	Left Side Elevation
Second Floor Plan	Specifications
Front Elevation	Detail Sheets
Rear Elevation	Delivered Price

Guaranteed Material Specifications

It should be understood that these plans are free only to those who buy the materials for the house. For this reason a small **TEMPORARY DEPOSIT** of from \$3 to \$7.50 is required from those who order plans and specifications. But remember this is refunded as soon as your order for materials reaches us. We hope you will understand that this small deposit scarcely covers the cost of making the blue prints and copying the specifications. It is not a payment in any sense of the word, nor do we question your good intentions. What we really do is to make it easy for our customers who have shown confidence in us. Without this small guarantee we would be swamped with requests for our plans from people who have no intention of building, nor any use for the plans. It would put a useless burden on us and add unnecessary cost to our materials. We are not in the plan business for a profit, but solely for the benefit of our customers. Therefore what we save by charging this small temporary deposit is yours—not ours. Also remember that any reliable architect would charge you from \$30 to \$90 for drawing these plans specially—it is the volume of business that enables us to give this service free to those who buy our houses.

CONTRACTORS LUMBER SUPPLY COMPANY, SEATTLE, WASH.

Plans Absolutely Accurate

The houses shown in this book were designed, and plans prepared with great caution. Our architects have investigated every climatic condition from ocean to ocean that might in any way affect the structure of a home. The material lists have been checked over and over again until absolute accuracy has been attained. And the best testimony to this fact comes from satisfied customers everywhere throughout our territory. The best testimony comes from the man who has tried us—and therefore knows.

Reversed Plans

It may be that your building site will require the plan to be reversed from the way it is shown in the book. This does not mean that anything is added to or taken from the plans. It does mean that every room will be just opposite from the way they now appear: the rooms on the right shifted to the left, and those on the left shifted to the right. This cannot possibly affect the architectural beauty of the house. An extra charge of \$2 is made for reversed plans in addition to the regular price shown in the plan book. This will be refunded when you order the materials from us.

WRITE FOR DELIVERED PRICES FREIGHT PAID BY US TO YOUR STATION

Special Plan Department

The plans shown in this book usually are just what our customers want; but occasionally some prefer to have plans drawn that will conform to special requirements and conditions. Our SPECIAL PLAN DEPARTMENT is at your service in this respect.

A study of the plans shown in this book will suggest valuable ideas of your own which you can set forth in special plans; for instance, you may prefer the roof design of one house, the floor plan of another, and the porch of a third.

Or you may suggest your own ideas for use in connection with some special feature of our stock plans. Our SPECIAL PLAN DEPARTMENT is maintained for this purpose. It will help you to embody many good ideas in the general plan you have in mind.

This special plan service is free to our customers only. A small cash deposit to protect us from curiosity seekers is all that is required. The amount you deposit is refunded when you send your order for material. The plans cost you nothing.

How to Order Special Plans

The best way to get our special plans is to make a rough sketch of the house you have in mind. The sketch need not be drawn to scale, but should show SIZE and arrangement of rooms. Be sure to give dimensions of rooms exactly as you want them, as any future change will cause additional delay and expense. Send us this sketch together with all possible information; such as the height of ceilings, kind of siding wanted, how house is to be heated, and whether it is to have a basement.

If you have a small picture of the house design you wish to follow, send it along, or mention the number and page where it may be found in any of the several plan books published, and we will incorporate the idea into plans. You cannot give us too much information; write freely and fully all you know about it. With this information forward a remittance of \$2.00 for each room, not counting closets, halls nor bath. On receipt of the above, our architects will prepare and send you preliminary sketches and plans drawn to scale, following your suggestions, all accurately and care-

fully worked out. Our architects will also suggest ideas that will help you save money in materials and construction without detracting from the value of the house.

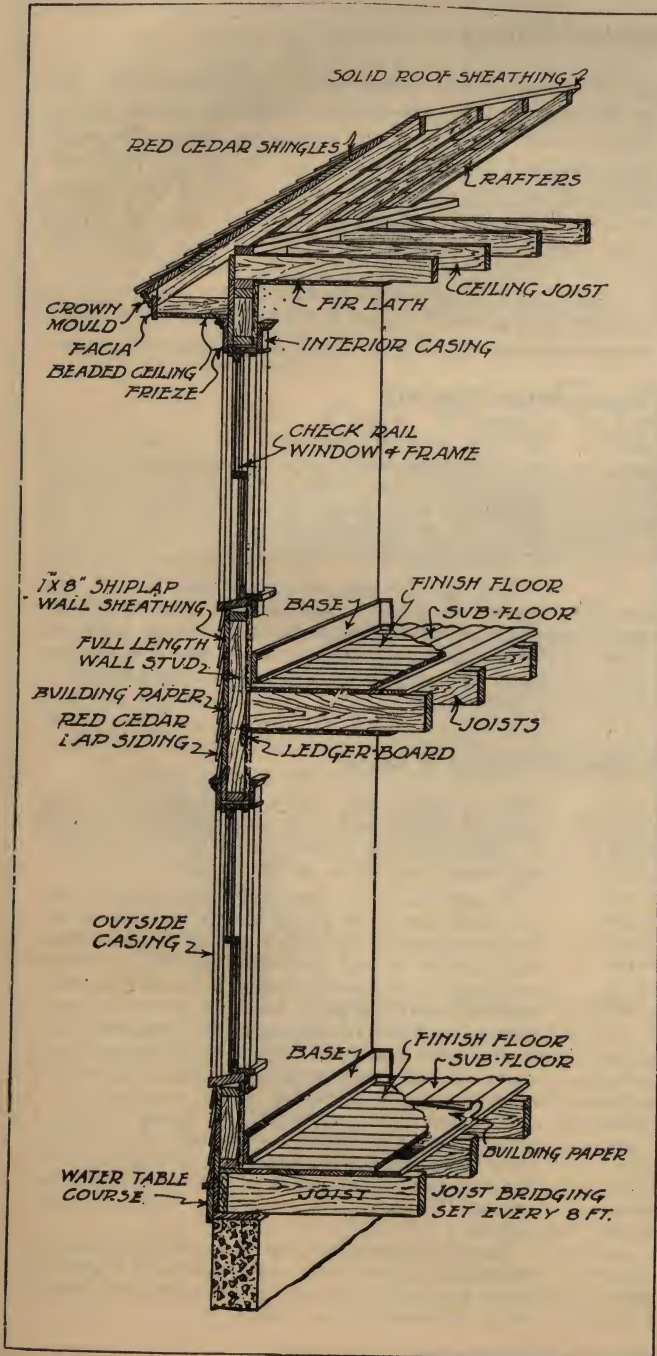

When you get the preliminary plans and sketches, you have the privilege of making any further changes you wish. In that case return the plans to us and these changes will be shown in the finished plans and blue prints; for this, an additional charge of \$2.00 for each room will be made. Even in this case the complete plans would cost you only \$4 for each room—about one-fifth of what a reliable architect would charge you for a similar job.

The completed plans will be perfect in every way; they will show every detail of construction. With them we send you complete specifications and guaranteed material bill, quoting you a delivered price—freight paid to your station.

Do not forget that the small deposit will be refunded to you when you buy your materials from us; you deduct it from your remittance when material bill is paid.

EXPLANATION OF CONSTRUCTION. We show on this page sections illustrating every detail of construction as planned for all houses on following pages. Your attention is called to the fact that the construction is Standard and better, and will meet every requirement for strength, durability and warmth.

On this and following page you will find a general specification of sizes and grades of all items of material furnished by us for the construction of these houses.

WHAT WE FURNISH

We can furnish all or any part of the following items of material for any house design shown in this book. When you write us for a delivered price on one of these houses, we will quote you on all of the material mentioned below, giving you separate figures on different lots as indicated—eight separate prices in all. You can then order such as you want, and omit those items not wanted.

(1) **LUMBER, LATH, SHINGLES**, finish and mill work, building paper and tar felt, also cabinet work where cabinet work is shown on plans. All in guaranteed sufficient quantities to complete the house according to blue print plans which will be furnished free to purchasers. See page 9 for a general description and specification of this part of the material bill.

(2) **PAINTING MATERIALS** complete, consisting of two coats for all outside wood work, except roof for which one coat of shingle stain is furnished. Also complete oils, stains, varnish, and other necessary materials for all inside wood work to make a perfect job throughout. A separate price will be quoted for painting materials.

(3) **HARDWARE, NAILS and TIN WORK** complete, which includes finish hardware for all doors, windows and sash, finish hardware for cabinet work (where cabinet work is included) nails in sufficient quantities and suitable sizes, sash cord and sash weights for all windows, and complete tin work such as gutters, down spouts, valley tin and tin flashings, and all other necessary tin work. A separate price is quoted on hardware, nails and tin work.

(4) **STORM DOORS and STORM SASH COMPLETE.** A separate price will be quoted for this storm equipment.

(5) **SCREEN DOORS and WINDOW SCREENS** complete. 1½ inches thick and of galvanized wire. A separate price will be quoted for screens.

(6) **HARDWOOD FLOORING.** At a small extra cost we can furnish hardwood flooring for our houses instead of fir. A separate price will be quoted for 13-16 x 2¼ Clear Maple Flooring, or Clear Plain Oak flooring for the main (first) floor instead of fir. For one story houses this means all inside flooring, and for two story houses it means all inside finish flooring for first floor only. If hardwood flooring is wanted only in living room and dining room, we will be pleased to quote on that basis also.

(7) **OAK or BIRCH INTERIOR FINISH and TRIM** instead of fir is desired by many of our customers, and when requested we will quote a separate and extra price for this hardwood finish and trim instead of fir in the living room, dining room, and entrance hall (if any).

(8) **FLAXLINUM** for outside walls. This is a very desirable feature that may be used to great advantage in extremely cold climates. It is manufactured in sheets one-half inch thick and 18 inches wide, with flanged edges for use between all outside studding. It adds greatly to the warmth of the house and is recommended as being superior to back plaster. A separate price is quoted for Flaxlinum.

Design No. 712. THE ROANOKE

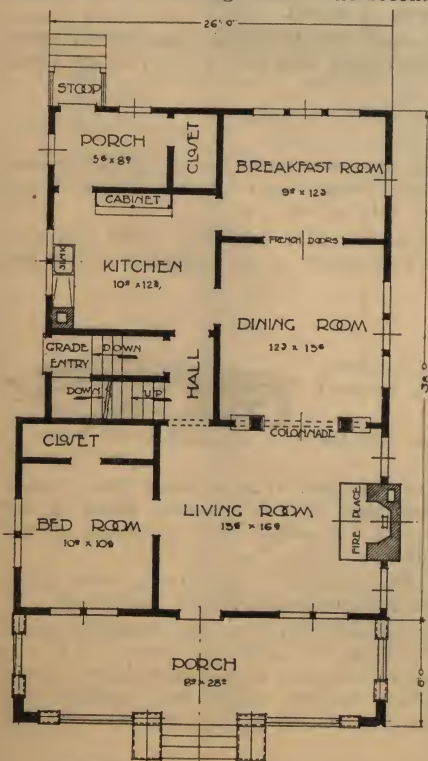

8 Rooms
and Bath

Write for Delivered Price
Freight Paid by Us to Your Station

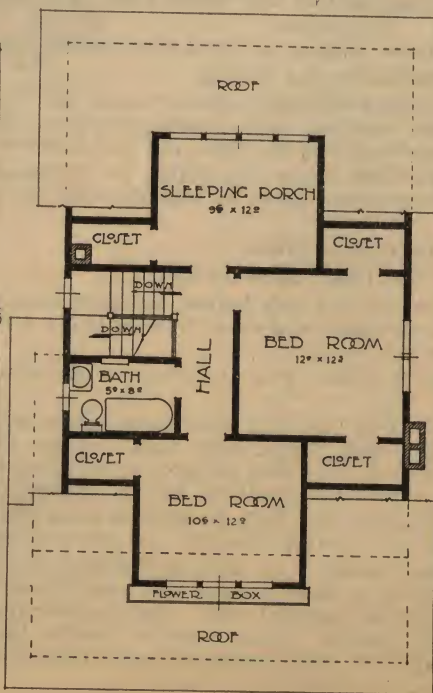

Size
28x38 Feet

The Roanoke is a semi-bungalow of exceptional beauty and refinement. The exterior appearance is pleasing and meets all the modern demands for elegance of outline.

The interior arrangement as shown by accompanying floor plans meets all modern requirements in the way of large living room with fireplace, breakfast room, enclosed rear porch and modern cabinet work. The bed room on the first floor may be converted into a cozy den by the substitution of French doors for the opening into the living room. The second floor contains two large bed rooms, the bath and a sleeping porch.

FIRST FLOOR PLAN

SECOND FLOOR PLAN

Height of ceiling, first floor, 9 ft. **Second floor**, 8 ft. **Floor joist**, first floor, 2x8; second floor, 2x8. **Ceiling joist**, 2x4. **Studding**, 2x4. **Main rafters**, 2x4. **Hip and valley rafters**, 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on centers.

Sub-Floor: First and second floors, 1x8 No. 1 Fir shiplap. **Red Rosin** paper for first floor lining. **Wall sheathing**, 1x8 No. 1 Fir shiplap and No. 2 Tar Felt. **Best** grade clear Red Cedar lap siding. **Shingles** Extra Clear 5/2-16 in. Red Cedar. **Roof boards** No. 1 common fir boards laid solid.

Inside doors No. 124 or 125. **Front door** No. 113 Bevel Plate or other door of about same value.

For complete additional specifications see page 9.

See pages 8 and 9 for what we furnish.

Design No. 745. THE ALEXANDRIA

6 Rooms and Bath	Write for Delivered Price Freight Paid by Us to Your Station	Size 34x28 Feet
---------------------	---	--------------------

This comfortable and convenient little home is of a design known as the Colonial Bungalow. In so far as the arrangement of rooms and interior details are concerned, it is not greatly different from the ordinary bungalow with a possible exception of a more general use of French doors and the addition of a sun room.

The exterior, however, is designed along different lines. Although not purely Colonial, there is a Colonial touch here and there which, added to the general simplicity of the design, makes a home that is not only distinctive, but one where the lasting architectural beauty will withstand the critical test of ever-changing styles.

The living room is quite large, being $13\frac{1}{2} \times 18\frac{1}{2}$ feet, with an open fire place and a coat closet near the entrance door. A pair of French doors connects it with the sun room, and a beautiful colonnade with the dining room. Note also the convenient situation of the kitchen with usual built-in cabinet work, the ample closet room and the handy disposition of the bedrooms and bath. An enclosed grade entrance provides access to the kitchen as well as to basement.

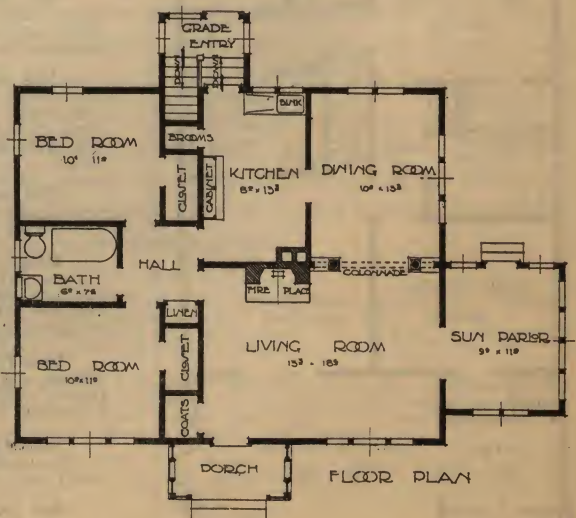

Height of ceiling, 8 ft. 4 in. Floor joist, 2x8, Ceiling joist, 2x4. Studding, 2x4. Main rafters, 2x4. Hip and valley rafters, 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on centers.

Sub-Floor: 1x8 No. 1 Fir shiplap. **Red Rozin** paper for floor lining. **Wall sheathing, 1x8 No. 1 Fir shiplap and No. 2 Tar Felt. Best grade Red Cedar lap siding. Shingles Extra Clear 5/2-16 in. Red Cedar. Roof boards No. 1 common fir boards laid solid.**

Size
28x46 Feet

In this prize winning, five room bungalow, we have that happy combination; artistic appearance, convenient plan arrangement and economical construction.

The double gable in front is relieved by the cross roof, giving a distinctive and pleasing effect and the long row of windows with attractive flower box combine with the triple French entrance to make an inviting and beautiful home.

The interior is modern in every respect and embodies all up-to-date built-in features including ironing board and breakfast nook. All of the rooms are of exceptional size and the coat closet in entry, stairs to attic and large bath all add to the convenience of an exceptionally well balanced plan arrangement.

The beauty of the interior is enhanced by French doors between the living and dining rooms and by the combined bookcases and fireplace at the end of the living room.

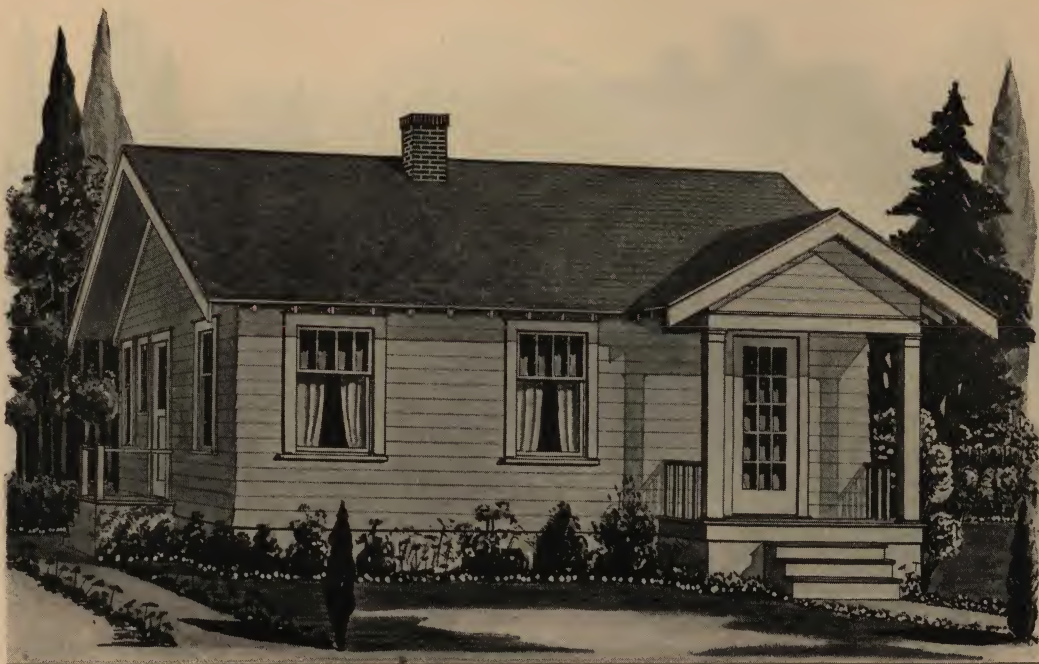

Height of Ceiling, 8 ft. 4 in. **Floor Joists,** 2x8. **Ceiling Joists,** 2x6. **Studding,** 2x4. **Main Rafters,** 2x4. **Hip or Valley Rafters,** 2x6. All dimension lumber No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 inches on centers.

Sub-Floor, 1x8 No. 1 Fir Shiplap. **Red Rosin** paper for floor lining. **Wall sheathing,** 1x8 No. 1 Fir Shiplap and tar felt between shiplap and siding. **Best** grade clear Red Cedar siding. Shingles, Extra Clear 5/2-16 in. Red Cedar.

Inside doors No. 124 or 125. **Front door** No. 109 Bevel plate, or choice of any other front door in catalogue. For complete additional specifications, see page 9.

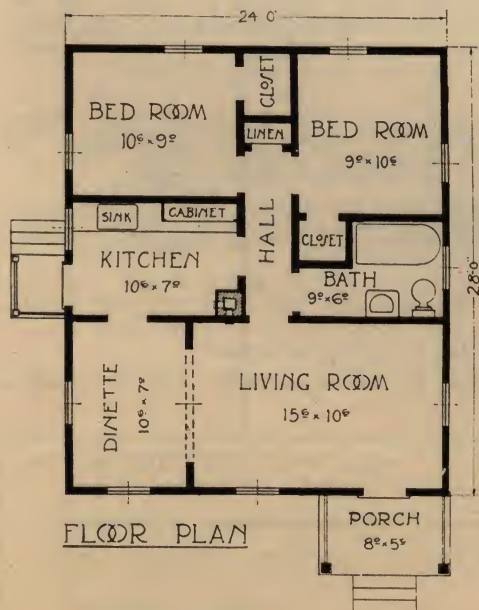

See pages 8 and 9 for what we furnish.

Floor Plan

This bungalow makes a direct appeal to the home builder with an artistic temperament who is also of a practical turn of mind. Many unique features are incorporated in this design. The exterior is very attractive, especially the front porch with the low gable roof and cobblestone base. The fireplace chimney is of cobblestone to match. Where cobblestone is not available, brick could be substituted. The floor plan speaks for itself.

Height of Ceiling, 8 ft. 3 in. Floor joists, 2x8. Ceiling joists 2x4. Studding 2x4. Main rafters 2x4. Valley rafters 2x6. All No. 1 Fir, dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Sub-Floor, 1x8 No. 1 Fir Shiplap. Red Rozin paper for floor lining. Wall Sheathing, 1x8 No. 1 Fir Shiplap and Tar felt paper. Best Grade Clear Red Cedar Siding. Shingles Extra Clear 5/2-16. in. Red Cedar.

Inside Doors, No. 124 or 125. Choice of any front door in Catalogue. For complete additional specifications see page 9.

See pages 8 and 9 for what we furnish.

4 Rooms and Bath	Write for Delivered Price Freight Paid by Us to Your Station	Size 24x36 Feet
---------------------	---	--------------------

This home has proven very popular in Seattle and Western Washington. It is for all practical purposes a five-room house as the living room is large enough to be used for a dining room when necessary, while on most occasions the breakfast nook will answer the purpose of dining room. Look this plan over carefully and you will agree with us that it is ideal for a house of this size.

Height of ceiling, 8 ft. 3 in. **Floor** joists, 2x8. **Ceiling** joists, 2x4. **Studding** and **Rafters**, 2x4. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on centers.

Sub-Floors and wall sheathing 1x8 No. 1 Fir Shiplap. Building paper for floor lining and tar felt between shiplap and siding. Best grade clear Red Cedar lap siding. **Shingles** Extra Clear 5/2-16 in. Red Cedar.

Front door No. 109 D. S. Glass. **Inside doors** Nos. 122, 124 or 125. For complete additional specifications see page 9.

Size
30x48 Feet

Beaver Creek, Minn., June 28, 1920.

Dear Sirs:

I am well satisfied with the lumber received from you. The house will soon be finished and I am sure advertising your material. A friend of mine from Luverne, Minnesota, was over and I showed him the lumber and let him take your catalogue. He intends to put up a large house.

C. SAMUELSON.

Here is a six room bungalow that is bound to please many of our customers. In appearance it is exceedingly attractive and well balanced in every detail. The disposal of the roof lines gives a distinctive feature to the house which is carefully carried out in the attractive front porch. The picture shown above speaks for itself and needs no praise in words.

The interior arrangement has been given much thought and painstaking work. The front door opens into an entry which is provided with a handy coat closet. Between the living and dining rooms is a book case colonnade and there is a fine built-in buffet in the dining room. It will be noted that the kitchen is fitted with a large cabinet extending full length of the room. At the rear of the kitchen is an enclosed porch which may also be used as a breakfast room. The three bedrooms are plentifully supplied with closets and all open into a hall giving easy access to bath room, and linen closet. The convenient grade entrance to basement should not be overlooked.

Height of ceiling, 9 ft. **Floor joist**, 2x10. **Ceiling joist**, 2x4. **Studding**, 2x4. **Main rafters**, 2x4. **Hip and Valley rafters**, 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on centers.

Sub-Floor: 1x8 No. 1 Fir shi lap. **Red Rosin** paper for floor lining. **Wall sheathing** 1x8 No. 1 Fir shi lap and No. 2 tar felt. **Best** grade Clear Red Cedar Lap Siding. **Shingles** Extra Clear 5/2-16 in. Red Cedar. **Roof** boards No. 1 common fir boards laid solid.

Inside doors No. 124 or 125. **Front door** No. 110 'B. P. or other door of about same value. For complete additional specifications see page 9.

Size
32x40 Feet

This house is of the semi-bungalow type, though it will be noticed that the exterior presents an originality in design. The general appearance is homelike and pleasing. The monotonous effect of a plain roof is relieved by the flat dormer with its three sash. The feature of the exterior is the large porch with its artistic brick piers and the arched entrance.

The interior arrangement is cozy and convenient. A beautiful fireplace adorns the living room which is separated from dining room by a bookcase colonnade. A recess buffet something like our No. 3166 is located at the end of the commodious dining room. The kitchen is provided with a large combination sink and kitchen cabinet. The three large bedrooms are plentifully provided with closets and all open into a hall with convenient access to the bath room. The cellar is reached from the outside through a grade entrance and from the inside through the kitchen.

Height of ceiling, 9 ft. Floor joist, 2x8. Ceiling joist, 2x4. Studding, 2x4. Main rafters, 2x4. All No. 1 Fir dressed on one side and one edge. All joists, studding and rafters spaced 16 in. on centers.

Sub-Floor: 1x8 No. 1 Fir shiplap. Red Rosin paper for floor lining. Wall sheathing 1x8 No. 1 Fir shiplap and No. 2 tar felt. Best grade Clear Red Cedar Lap Siding. Shingles Extra Clear 5/2-16 in. Red Cedar. Roof boards No. 1 common fir boards laid solid.

Inside doors No. 124 or 125. Front door No. 107 B. P. or other door of about same value. For complete additional specifications see page 9.

"OUR HOUSE IS BEAUTIFUL AND WE ARE DELIGHTED WITH IT"

Contractors Lumber Supply Co.,
Seattle, Wash.

Longmont, Colo., Dec. 23, 1918.

Dear Sirs:

Our house is beautiful throughout and we are delighted with it. We are especially proud of the doors. Our front door No. 109 in your catalogue, and all the inside doors of just one panel every one admires that have seen them.

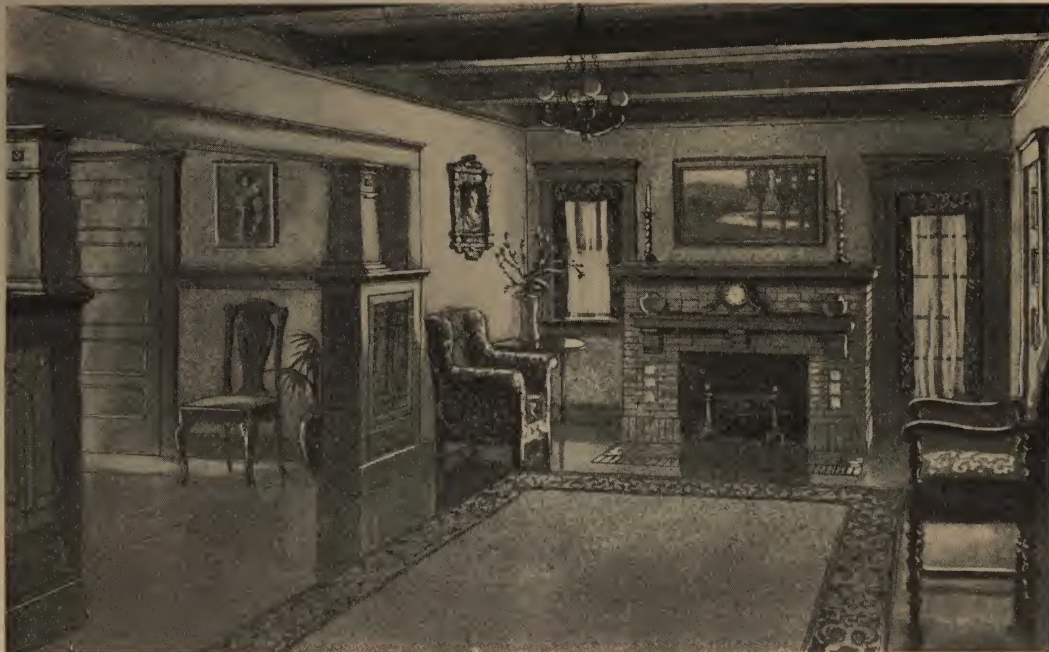

The buffet and book case arch are also especially fine features of the house.

I am more pleased with our home each day we live in it, and so far wouldn't have a thing different about it. After we get it all furnished and the windows draped, I hope to send you a picture of it.

Sincerely yours,

MRS. J. BURTLE.

Size
39x38 Feet

We consider the Magnolia one of the prettiest and most convenient small homes shown in any plan book, and we believe that a careful examination of the picture and floor plan will convince you that this is so. There was a time when appearance didn't matter, but that time has past. The careful home builder of today wants the house to present an appearance of beauty without as well as comfort and convenience within. Both of these requirements are found in this design.

The double bracketed porch roof, and the brick buttressed terrace with flower boxes are distinctive features and greet you pleasantly as you approach.

The interior arrangement radiates comfort and coziness throughout the house. A view of the living room, showing fire place and entrance to dining room is shown on the preceding page. The living room is spacious in size and extra well lighted through windows and doors both at front and back. The built-in features of the Magnolia consist of a book case colonnade between living room and dining room, a beautiful recess buffet, a large combination kitchen and sink cabinet, linen closet, broom closet, medicine cabinet, etc. If you desire a five room bungalow containing all modern features, you will find your problem solved here.

Height of ceiling, 9 ft. **Floor joist**, 2x8. **Ceiling joist**, 2x4. **Studding**, 2x4. **Main rafters**, 2x4. **Hip and valley rafters**, 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on centers.

Sub-Floor: First and second floors, 1x8 No. 1 Fir shiplap. **Red Rosin** paper for first floor lining. **Wall sheathing**, 1x8 No. 1 Fir shiplap and No. 2 tar felt. **Best grade Clear Red Cedar** lap siding. **Shingles** Extra Clear 5/2-16 in. Red Cedar. **Roof boards** No. 1 common fir boards laid solid.

Size
26x44 Feet

Many people have the impression that the bungalow is adapted only to warm climates. This is a mistake. Our bungalows are designed for construction suitable to the coldest climate.

The Shasta shown on this page has many distinctive features, among which is the projecting porch supported by shapely brick piers and buttress. The exterior chimney at front of the house but adds to the bungalow style.

The living room connects with the cozy den through a pair of French doors. The open fire place in the den makes this a cheerful nook for reading and study. The dining room is separated from the living room by a book case colonnade. A recess buffet in the dining room and a large cabinet in the kitchen are convenient built-in features. The rear entrance to kitchen is through a screened porch. The two bedrooms have unusual closet accommodations and are convenient to the bath.

Height of ceiling, 9 ft. Floor joist, 2x8. Ceiling joist, 2x4. Studding, 2x4. Main rafters, 2x4. Hip and valley rafters, 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on centers.

Sub-Floor: First and second floors 1x8 No. 1 Fir shiplap. **Red Rosin** paper for first floor lining. **Wall Sheathing,** 1x8 No. 1 Fir shiplap and No. 2 tar felt. **Best grade** Clear Red Cedar Lap Siding. **Shingles** Extra Clear 5/2-16 in. Red Cedar. **Roof** boards No. 1 common fir boards laid solid.

Inside doors No. 124 or 125. **Front door** No. 112 Bevel Plate or other door of about same value. For complete additional specifications see page 9.

Size
28x40 Feet

Montevideo, Minn., June 19th, 1920.

Gentlemen:

Wish to say the lumber and mill work arrived June 4th in first class shape and shows up as very good material. We have not checked it all over as yet. I have several visitors every day and all are very much interested in the lumber and all think it very fine material.

JOHANNES HANSON.

The Alameda is not just a house. It is a real home in every sense of the word. If you like the bungalow style of house and five rooms and bath are sufficient for your needs, this design will be found to contain all that could be desired. The front porch is large and inviting and is artistically ornamented by the brick buttress piers and the doweled columns.

The living room is entered from the front porch through a doorway enclosed with our front door No. 110. A cozy fire place adorns the living room and the beamed ceilings add to the homelike effect. A recess built-in buffet is found in the large dining room, which is separated from living room by a book case colonnade. Special attention is called to the unusually large kitchen and the 13 ft. combination kitchen and sink cabinet extending full length of the room. The grade entrance to the basement through an enclosed porch. Both bed rooms open into the hall at the end of which is the bath room. A linen closet in the hall is convenient to bed rooms and bath.

Height of ceiling, 8 ft. (ceiling can be made higher if desired at slight extra cost.) **Floor** joist, 2x8. **Ceiling** joist, 2x4. **Studding**, 2x4. **Main** rafters, 2x4. **Hip** and **Valley** rafters, 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on centers.

Sub-Floor: First and second floors 1x8 No. 1 Fir shiplap. **Red Rosin** paper for first floor lining. **Wall** sheathing 1x8 No. 1 Fir shiplap and No. 2 tar felt. **Best** grade Clear Red Cedar Lap Siding. **Shingles** Extra Clear 5/2-16 in. A really beautiful home. A masterpiece of architectural beauty and practical convenience. This is the verdict that will be pronounced by everybody who sees this house. This is a bungalow that will be admired from without as well as within. You can build this home with the assurance that you will have a residence that is decidedly distinctive in appearance as well as comfortable and practical in all respects.

Three large bed rooms with ample closets, a spacious living room with beamed ceilings, a comfortable dining room provided with a built-in buffet, a large kitchen with large cabinets, all on an area of 32x44 feet. Attention is also called to the bookcase and seat on each side of fire place, the book case colonnade between living room and dining room, the linen closet in hall, the convenient bath room and the enclosed rear porch from which the basement is reached in connection with a grade entrance. If you are looking for a six room bungalow, the Hermosa is bound to appeal to you.

Height of ceiling, 9 ft. Floor joist, 2x10. Ceiling joist, 2x4. Studding, 2x4. Main rafters, 2x4. Hip and valley rafters, 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on centers.

Sub-Floor: First and second floors, 1x8 No. 1 Fir shiplap. **Red Rosin** paper for first floor lining. **Wall Sheathing** 1x8 No. 1 Fir shiplap and No. 2 tar felt. **Best grade Clear Red Cedar Lap Siding. Shingles Extra Clear 5/2-16 in. Red Cedar. Roof boards** No. 1 common fir boards laid solid.

Inside doors No. 124 or 125. **Front door** No. 110 bevel plate or other door of about same value. For complete additional specifications see page 9.

HONEYHILL FARM

Powell, Wyoming, July 12, 1920.

Contractors Lbr. Supply Co.,
Seattle, Wash.

Gentlemen:

Yours of the 7th was received Saturday. The car of lumber came through in record breaking time, and got here nearly two weeks before I expected it. I am well satisfied with the quality of the material; the lumber runs far better than I could have got from the local yards. I am therefore mighty well pleased with it.

Very truly yours,

JOHN HENDRICKS.

We regard this as an exceptionally artistic and convenient bungalow of five rooms and bath. The design is of the true bungalow type, having a spacious living room and dining room in one. This is a feature of many modern homes and has numerous advantages over separate living and dining rooms. This room has a fireplace with bookcases on each side, with French doors opening on to the side porch. The kitchen is ample in size and is provided with a built-in kitchen cabinet as will be noted on plans. A grade entrance to the basement also provides entrance to the kitchen through a small enclosed porch or vestibule. The two bedrooms, the bath and linen closet are reached from a hall which in turn opens into both the living room and kitchen.

In beauty of exterior the Hollywood leaves nothing to be desired. Note the bracketed hood over the entrance, also the tapered brick piers and the position of the chimney, all of which add to the harmony of the general effect. The picture shown on this page gives but an imperfect idea of the beauty of this little home.

Height of ceiling, 9 ft. Floor joists, 2x8. Ceiling joists, 2x4. Studding, 2x4. Rafters, 2x4. All joists, studding and rafters spaced 16 in. on center.

Sub-floor, 1x8 No. 1 Fir Shiplap and Red Rozin paper. Wall sheathing, 1x8 No. 1 Fir Shiplap and Tar felt paper. Best Grade Clear Red Cedar Lap Siding. Shingles Extra Clear 5/2-16 in. Red Cedar.

Inside doors Nos. 124 or 125. Front door No. 108 or other door of about same price. For complete additional specifications see page 9.

See pages 8 and 9 for what we furnish.

It is difficult to select words suitable to describe the beauties and conveniences of this thoroughly modern bungalow. Here is a complete home all on one floor. Three large bed rooms well lighted and provided with commodious closets. A bath room convenient to all bed rooms. A large entry or vestibule with coat closet. An extra large and well lighted living room which is connected with dining room by pair of beautiful French doors. A large and beautiful dining room furnished with Buffet No. 3167. A roomy kitchen with convenient kitchen cupboard and folding ironing board. The exterior appearance is extremely beautiful and pleasing. This is the home you have long wanted to build, and we are glad to offer you the opportunity to own it by reason of our money-saving prices.

Height of ceiling, 9 ft. **Floor joists**, 2x10. **Ceiling** joists, 2x6. **Studding**, 2x4. **Main rafters**, 2x4. **Valley** rafters, 2x6. All No. 1 Fir, dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Sub-Floors, 1x8 No. 1 Fir Shiplap. **Red Rozin** paper for floor lining. **Wall Sheathing**, 1x8 No. 1 Fir Shiplap and Tar felt paper. **Best Grade** Red Cedar Shingles for Siding. (Cedar lap siding will be supplied instead of shingles, if desired.) **Roof Shingles** Extra Clear 5/2-16 in. Red Cedar.

Inside Doors No. 124 or 125. **Choice** of any front door in Catalogue. For complete additional specifications see page 9.

26x41 Feet

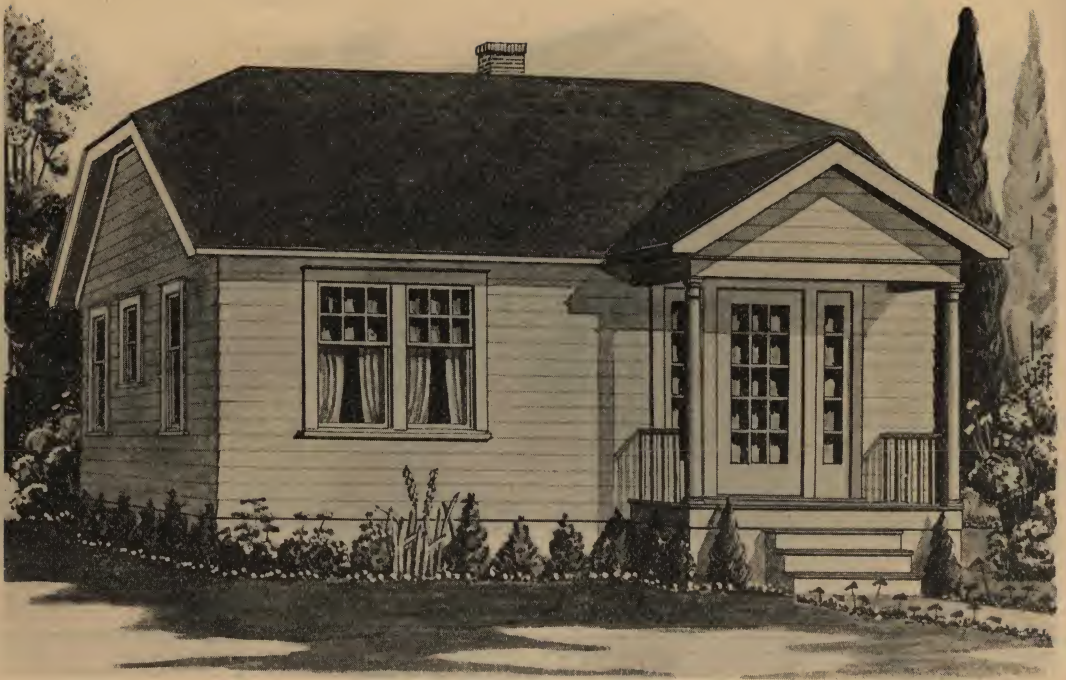

This home will make an especial appeal to one who is looking for a modern five-room bungalow that can be erected at a moderate cost. It contains many features not found in the house of this type. Note the vestibule entrance and closet for coats and hats, also the grade entrance to basement and the enclosed rear porch. The living room and dining room are both large and well lighted and connected by a beautiful book case colonnade. The kitchen is provided with large combination kitchen and sink cabinet and a closet or pantry. The bath room is conveniently located between the two bed rooms which are connected by a hall from which entrance is gained to dining room. The attractive front porch is walled up, making it easy to enclose with sash or screens.

Height of ceiling, 8 ft. 4 in. **Floor joist**, 2x8. **Ceiling joist**, 2x4. **Studding**, 2x4. **Rafters**, 2x4. All of No. 1 Fir, dressed side and edge, and placed 16 inches on centers. Extra Clear 5/2-16 in. Red Cedar Roof Shingles. **Best Grade** clear, red cedar siding. Wall Sheathing, 1x8, No. 1 Fir Shiplap and Tar Felt paper. Flooring, 1x4 No. 1 Clear Edge Grain Fir. Shiplap sub-floor covered with Red Rozin paper. Front Door, No. 108 D. S., or your choice of another door of similar price. Inside doors, No. 122. For additional specifications see page 9. At price quoted we furnish everything in shape of wood work, glass work and building papers and felts, as described on pages 8 and 9.

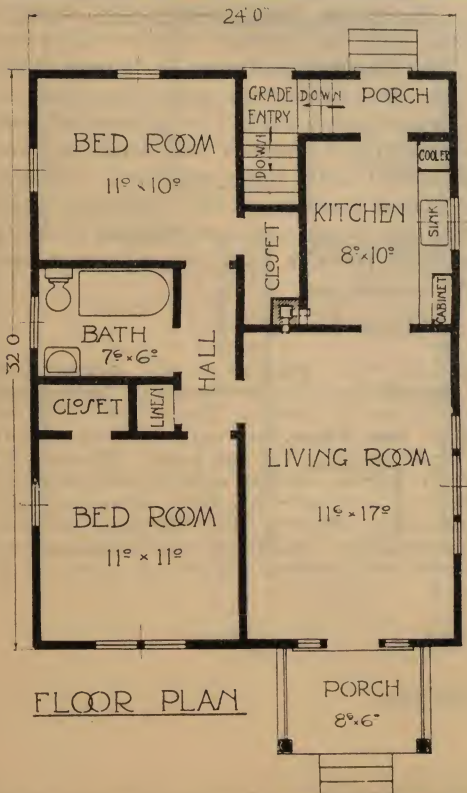

Plans complete for this house, \$5.00. See page 6 for free plan offer.

SAVED NEARLY THREE HUNDRED DOLLARS

Penn, N. D., Oct. 25, 1919.

Dear Sirs:

Am enclosing a picture of granary I built of lumber bought of you. This lumber cost me \$507.00 including freight. Had same priced to me for \$800.00 by local lumber companies before buying of your company. Am very well satisfied and if I ever do any more building, am satisfied you will sell me the lumber.

WILLIAM PASSOW.

Size
26x32 Feet

In this modernized colonial residence we have something different in a two-story house. This type of two story construction is by far the most economical home that can be built and in this particular residence the colonial entrance, shutters, wide cornice and flower boxes give the added touch needed to convert an otherwise severe design to a beautiful imposing home.

In the plan we find many convenient and practical divergencies from the usual arrangement. The downstairs bed room can be used for a den or library if desired and the breakfast room is accessible from both the kitchen and the dining room. There is a toilet on the grade entrance in addition to the large bath on the second floor and the bed rooms are well lighted and supplied with exceptionally large closets in addition to a handy dressing room.

Height of ceiling, first floor, 8 ft. 4 in. **Second floor**, 8 ft. 4 in. **Floor** joists, 2x8. **Ceiling** joists, 2x4. **All dimension** No. 1 Fir dressed one side and one edge. **All joists**, studding and rafters spaced 16 in. on centers.

Red Rosin paper between sub-floor and finish floor. **Tar Felt** between wall sheathing and cedar siding, also between roof boards and shingles.

Inside doors No. 124 or 125. **Front door** No. 109, or choice of any other front door in our catalogue.

See pages 8 and 9 for what we furnish.

The Jackson is a type of the ever popular square house with a pleasing variation noticeable in the roof plan and the porch. It will appeal to the home owner who likes the comfort and convenience obtainable only in the square construction, and at same time wants an attractive and substantial looking exterior. Your attention is called to the extra large living room with its bay window and fireplace. The dining room is also provided with a fire place and is well lighted. A convenient feature is the access to main stairs from the kitchen as well as from the living room. Four large and well lighted bed rooms as well as bath are found on the second floor.

Height of ceiling, first floor, 9 ft.; Second floor, 8 ft. Floor joists, first floor, 2x8; second floor, 2x8. Rafters, 2x4. All No. 1 Fir, dressed one side and one edge. All

joists, studding and rafters spaced 16 in. on center. **Sub-Floors:** First and second floors, 1x8 No. 1 Fir Shiplap. **Red Rozin** paper for first floor lining. **Wall Sheathing, 1x8 No. 1 Fir Shiplap and Tar felt paper. Best Grade Clear Red Cedar Siding. Shingles Extra Clear 5/2-16 in. Red Cedar. Inside doors No. 122. Front doors No. 104, or other doors of similar price. First Floor Plan.

In appearance and design this type of house has yet to be surpassed. From a structural standpoint it is especially adaptable when erected in a frigid climate.

This is one of the most popular of the many houses built from the plans prepared by our architects.

Second Floor Plan.

Height of ceiling, first floor, 9 ft. 3 in. Second Floor, 8 ft. 3 in. Floor joists, first floor, 2x8. Second floor 2x8. Ceiling joists 2x6. Studding 2x4. Main rafters 2x4. Hip and Valley rafters 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Sub-Floors: First and second floors 1x8 No. 1 Fir Shiplap. Red Rozin paper for first floor lining. Wall Sheathing 1x8 No. 1 Fir Shiplap and Tar Felt paper. Best Grade Clear Red Cedar Siding. Shingles Extra Clear 5/2-16 in. Red Cedar.

Plans complete for this house, \$6.00. Free plan offer on page 6.

Here is a practical and comfortable home of nine rooms. It is 28 feet wide and 43 feet deep, not including the large front porch. It is suitable for a country home and just the house for a large family.

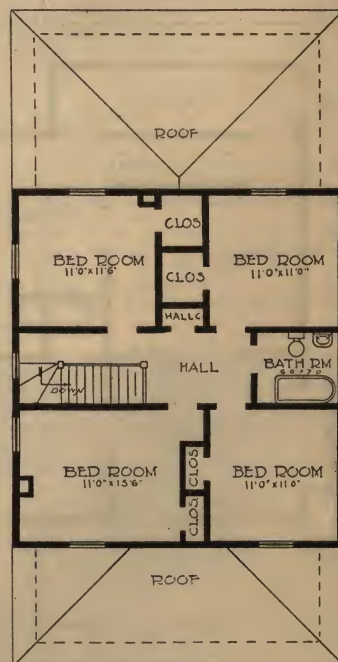

The large rooms on the first floor can be thrown into one. It not only has all the conveniences of the farm home but many seldom found comforts. The den, just off the living room, is one of the special features, also the inside wash room and the pantry just off the kitchen.

There are five bed rooms, each having two large windows, making it possible to sleep on hot summer nights.

Height of ceiling first floor, 9 ft. 4 in. Second floor, 8 ft. 3 in. Floor joist first floor, 2x8. Second floor, 2x8. Ceiling joist, 2x4. Studding, 2x4. Main rafters, 2x4. Hip rafters, 2x6. All No. 1 Fir, dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Sub-Floors first and second floors, 1x8 No. 1 Fir Shiplap. Red Roxin paper for first floor lining. Wall Sheathing, 1x8 No. 1 Fir Shiplap and Tar felt paper. Best Grade Clear Red Cedar Siding. Shingles Extra Clear 5/2-16 in. Red Cedar.

Inside Doors No. 122. Choice of any front door in catalogue. For complete additional specifications see page 9.

Size
30x45 Feet

Here is a Bungalow that is the result of our many years of experience in special plan work for our customers. Many people want to build a home to meet present needs that offers possibilities of future enlargement without altering appearance of the house. The Longmont meets this need. Here is a beautiful home with six rooms all on one floor, complete in itself, but arranged so that two or three large airy rooms can later be finished on second floor. Very little can be said that will add to the story told by the above photograph and the accompanying floor plan. The built-in features of this house are a book-case colonnade, dining room buffet, combination kitchen cupboard and sink cabinet, and a wardrobe in kitchen entry.

Height of ceiling, 9 ft. **Floor joists**, 2x10. **Ceiling joists**, 2x6. **Studding**, 2x4. **Rafters**, 2x4. All No. 1 Fir, dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Size
24x33 Feet

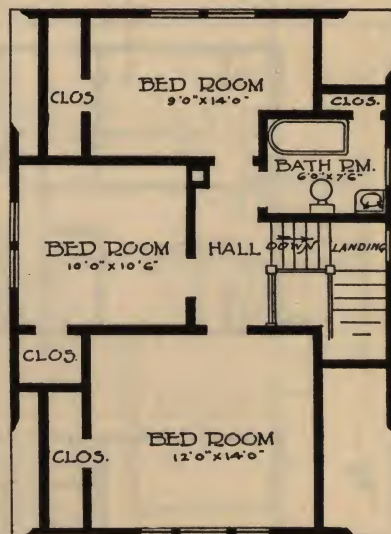

First Floor Plan.

The Gambrel roof has always proven very popular. It has many merits beside appearance. In the extreme climates it commends itself because of its insulating properties.

A study of the second floor plan will reveal the fact that in addition to the regular roof there is also a partition wall enclosing a dead air space which is the most scientific method of preventing the penetration of heat and cold.

The large front porch, extending the entire width of the house, and supported by three massive columns, lends strength as well as ornamentation to the exterior.

Second Floor Plan.

Height of ceiling, first floor, 9 ft. Second Floor, 8 ft. Floor joists, first floor, 2x8. Second floor, 2x8. Ceiling joists, 2x4. Studding, 2x4. Main rafters 2x4. Hip and Valley rafters 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Sub-Floors: first and second floors, 1x8 No. 1 Fir shiplap. Red Rozin paper for first floor lining. Wall Sheathing 1x8 No. 1 Fir shiplap and tar felt paper. Best Grade Clear Red Cedar Siding. Roof Shingles Extra Clear 5/2-16 in. Red Cedar.

36x44 Feet

Our "House of the Seven Gables" is the last word in modern architecture. The most exclusive districts in any city of the United States are not too good for this beautifully designed bungalow.

Limited space will permit us to call attention to but a few of its excellent features. The exterior and interior views would speak for themselves if it were possible to produce a picture which would do them justice.

The front porch extends around the side to the pergola beams which are beautiful when covered with vines.

The ceilings of the living and dining rooms are beamed as indicated by the dotted lines. Every piece of No. 544 ceiling beam is especially selected to secure the maximum beauty of grain.

A colonnade separates the living and dining rooms and the dining room is paneled up five feet with the famous three-ply Rotary Cut Fir Veneer panels, finished at the top with a three member plate rail. The china closet shown is buffet No. 3164.

Height of ceiling, 9 ft. 4 in. Floor joists, 2x10. Ceiling joists, 2x6. Studding, 2x4. Main rafters, 2x4. Valley rafters, 2x6. All No. 1 Fir, dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Sub-Floors, 1x8 No. 1 Fir shiplap. Red Bozin paper for floor lining. Wall Sheathing, 1x8 No. 1 Fir shiplap and tar felt paper. Extra Clear 5/2-16 in. Red Cedar Shingles for roof and siding. (Cedar lap siding will be supplied instead of shingles, if desired.)

Design No. 633. THE PUKWANA

5 Rooms and Bath	Write for Delivered Price Freight Paid by Us to Your Station	Size 24x42 Feet
---------------------	---	--------------------

Our No. 633 is sure to prove a very popular plan with those who desire comfort, neatness and convenience at a low cost, and at the same time desire beauty of design. The stucco porch columns and gable panels, harmonizing with the shingle walls, and crowned with its broad bracketed cornice, is pleasing to the eye of the most critical. The attractive arrangement of the rooms is such, that it results in a well balanced plan.

Height of Ceiling, 8 ft. 3 in. Floor joists, 2x8, Ceiling joists, 2x4. Studding, 2x4. Main rafters, 2x4. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Sub-Floors, 1x8 No. 1 Fir Shiplap. Red Rozin paper for floor lining. Well Sheathing 1x8 No. 1 Fir Shiplap and Tar felt paper. Best Grade Clear Red Cedar Siding or shingled walls as shown by plans. Your option. Shingles Extra Clear 5/2-16 in. Red Cedar.

Inside Doors No. 124 or 125. Choice of any front door in Catalogue.

For complete additional specifications see page 9.

See pages 8 and 9 for what we furnish.

Plans complete for this house, \$5.00. Free plan offer on page 6.

Contractors Lumber Supply Co., Seattle, Wash.

Dear Sirs: Thank you for your letter and quotations. Am figuring on a brick bungalow with a farmer who is so well pleased with material and work in the bungalow built from your shipment last spring that I feel pretty sure of the contract. Expect to know definitely within a week. Am sending you the bill herewith, and would like a lump figure as soon as possible.

(Name furnished on request.)

Design No. 615. THE COLUMBIA

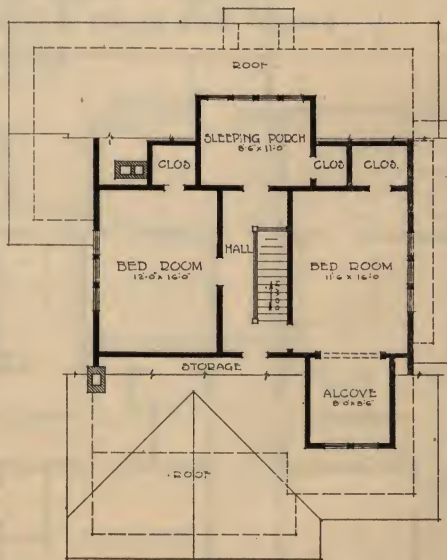

8 Rooms
and Bath

Write for Delivered Price
Freight Paid by Us to Your Station

Size
38x44 Feet

First Floor Plan.

Second Floor Plan.

This eight-room bungalow is of a type which may be erected at a medium cost, yet contains large accommodations. In addition to the eight rooms it has many smaller rooms, and many convenient features, thereby making this particular plan a decided success. The exterior view is indeed pleasing and denotes complete harmony in all its lines. The arrangement of the various rooms are beyond criti-

cism, and to anyone desiring a home of this size our No. 615 cannot be surpassed.

Height of ceiling, first floor, 9 ft. Second floor, 8 ft. Floor joists, first floor, 2x10. Second floor, 2x8. Ceiling joists, 2x4. Studding, 2x4. Main rafters, 2x4. Hip and Valley rafters, 2x6. All No. 1 Fir, dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Sub-Floors: First and second floors, 1x8 No. 1 Fir shiplap. **Red Rozin** paper for first floor lining. **Wall Sheathing**, 1x8 No. 1 Fir shiplap and tar felt paper. **Best Grade Clear Red Cedar** siding. **Shingles** Extra Clear 5/2-16 in. Red Cedar.

Inside Doors, No. 124 or 125. **Choice of any front door** in Catalogue. For complete additional specifications see page 9.

Freight Paid by Us to Your Station

Size
28x28 Feet

This is a full two-story home that is somewhat of a departure from the usual square house of this type. Note the wide cornice and the artistic porch roof with its dormer and the heavy columns with brick pedestals. The feature of the house is the enclosed rear porch and balcony over same reached from the second floor. The floor plan and arrangements of rooms speaks for itself.

Height of ceiling, first floor, 9 ft. 4 in. **Second floor,** 8 ft. 3 in. **Floor joist,** first floor, 2x10. **Second floor,** 2x8. **Celling joist,** 2x6. **Studding,** 2x4. **Main rafters,** 2x4. **Hip rafters,** 2x6. All No. 1 Fir, dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Design No. 627. THE YOSEMITE

6 Rooms and Bath	Write for Delivered Price Freight Paid by Us to Your Station	Size 36x48 Feet
---------------------	---	--------------------

When contemplating the erection of a new home, why not consider one that meets your requirements, and at the same time is a credit to yourself and family. In presenting our Yosemite we feel that we are meeting the need of the home-builder who desires an artistic design as well as a convenient and "roomy" house. The floor plan, as well as the exterior view, is particularly interesting. The two porches are an advantage, as one or the other is generally shady at any hour of the day. The large living room 14 by 22 feet in size is hospitality itself. The brick paved ingle nook, with a broad brick fireplace, having comfortable seats on either side, enhances its charm. Built-in bookcase buttresses are located between the living and dining room. The broad Dutch windows in dining room, with its wide ledge for potted plants, lend an air of distinction. A butler's pantry containing plenty of shelves is located between the dining room and kitchen. Other built-in features, including dining room buffet, ceiling beams, plate

rail, panel wainscot, also kitchen sink cabinet and bath room medicine cabinet, add to the convenience and appearance of this beautiful home. This bungalow will make a splendid suburban home, but is equally well adapted for city use where space is available.

Height of ceiling, 9 ft. **Floor** joists, 2x8. **Ceiling** joists, 2x4. **Studding**, 2x4. **Rafters**, 2x4. All No. 1 Fir, dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Sub-Floors, 1x8 No. 1 Fir shiplap. **Red Rozin** paper for floor lining. **Wall Sheathing**, 1x8 No. 1 Fir shiplap and tar felt paper. **Best** Grade Clear Red Cedar siding. **Shingles** Extra Clear 5/2-16 in. Red Cedar.

Inside Doors No. 124 or 125. **Choice** of any front door in Catalogue. For complete additional specifications see page 9.

Design No. 868. THE IVANHOE

5 Rooms
and Bath

Write for Delivered Price
Freight Paid by Us to Your Station

Size
26x32 Feet

In the Ivanhoe we have a small home with all the conveniences of a much larger residence.

The large breakfast room between the kitchen and living room with the handy buffet, the large attic and full basement make this house the equivalent in every way of many six room homes.

An exceptionally attractive exterior appearance is obtained by the use of the steep roof, tudor arched entrance, and brick terrace and chimney. These features also combine to give a decided old English character to the design.

Height of ceiling, 8 ft. 4 in. **Floor joists**, 2x8. **Ceiling joists**, 2x8. **Studding**, 2x4. **Main rafters**, 2x4. **Valley rafters**, 2x6. All dimension, No. 1 Fir dressed one side and one edge, and all spaced 16 in. on centers.

Sub-Floor, 1x8 No. 1 Fir shiplap. **Red Rozin** paper between sub-floor and finish floor. **Wall sheathing**, 1x8 No. 1 Fir shiplap and tar felt between sheathing and cedar siding, also between roof boards and shingles.

Inside doors No. 124 or 125. **Front door** No. 109 with side lights to match. For complete additional specifications, see page 9.

See pages 8 and 9 for what we furnish.

Design No. 606. THE LEWISTOWN

5 Rooms
and Bath

Write for Delivered Price
Freight Paid by Us to Your Station

Size
24x36 Feet

Floor Plan.

The semi-bungalow picture above as designed is a comfortable home for a small family.

It is convenient in arrangement, compact, and very easily heated. Even the front porch suggests coziness. The entrance door into the living room is at the side rather than in front, thus adding to the attractiveness of the exterior.

There is an ideal arrangement of all rooms. The interior finish in this, and all our houses, is selectd beautiful grained old growth Washington fir unless otherwise desired.

Height of ceiling, 8 ft. 4 in. Floor joist, 2x8. Ceiling joist, 2x4. Studding, 2x4, Rafters, 2x4. All of No. 1 Fir dressed side and edge, and placed 16 inches on centers. Extra Clear 5/2-16 in. Red Cedar Roof shingles. Best Grade clear, red cedar siding. Wall Sheathing, 1x8, No. 1 Fir Shiplap and Tar Felt paper. Flooring 1x4 No. 1 Clear Edge Grain Fir. Shiplap sub-floor covered with red rosin paper. Front Door, No. 108 D. S., or your choice of another door of similar price. Inside doors, No. 122. additional specifications see page nine. At price quoted we furnish everything in shape of wood work, glass work and building paper and felts, as described on page nine.

Plans complete for this house, \$5.00. See page 6 for free plan offer.

Cody, Wyoming, February, 1919.

Dear Sirs:

We are very much pleased with our house design No. 606, the Lewistown. We have been living in it about 18 months now and appreciate it more all the time. If I ever build again, the Contractors Lumber Supply Co. will surely get my order.

Design No. 609. THE SHOSHONE

5 Rooms and Bath	Write for Delivered Price Freight Paid by Us to Your Station	Size 24x34 Feet
---------------------	---	--------------------

If you desire a five room cottage that combines comfort, convenient arrangement and low price, you need not look further than the Shoshone.

This type of cottage has won a widespread and deserved popularity, due to its homelike appearance, its convenient arrangement and economy of construction.

The living room and dining room are separated by a beautiful colonnade. The bath room, located near, yet apart from the other rooms, is entered from the hall which leads to the two bed rooms. The basement stairs, leading from the kitchen, are in the most practical place. With just a little thought one can determine why this arrangement of rooms is such a favorite throughout the whole country. The arrangement of rooms is old but the price is something decidedly new.

Height of ceiling, 8 ft. 4 in. Floor joists, 2x8. Ceiling joists, 2x6. Studding, 2x4. Main rafters, 2x4. Hip rafters, 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters 16 in. on center.

Sub-Floors, 1x8 No. 1 Fir shiplap. Red Rozin paper for floor lining. Wall Sheathing, 1x8 No. 1 Fir shiplap and tar felt paper. Best Grade Clear Red Cedar siding. Roof Shingles Extra Clear 5/2-16 in. Red Cedar.

Inside Doors No. 122. Choice of any front door in Catalogue. For complete additional specifications see page 9.

Design No. 610. THE FAIRHAVEN

6 Rooms and Bath	Write for Delivered Price Freight Paid by Us to Your Station	Size 30x40 Feet
---------------------	---	--------------------

Floor Plan.

Seven years' experience in designing and planning homes for our customers in fourteen states has resulted in the development of this attractive six-room cottage. It is designed along simple lines, yet it is very attractive and decidedly distinctive. The pleasing feature of the exterior of this house is the beautiful front porch with its artistic gable sash and the columns with brick pedestals. A grade entrance to basement connects with steps from the kitchen. The Queen Anne windows add a touch of beauty that could not be had with plain two-light windows.

The interior arrangement shows the result of careful and expert planning. The three large bed rooms are supplied with plenty of closet space and are extra well lighted with double windows. A beautiful book-case colonnade is between living room and dining room. The kitchen is commodious and provided with a built-in cupboard.

Height of ceiling, 8 ft. 3 in. **Floor joist,** 2x10. **Ceiling joist,** 2x6. **Studding,** 2x4. **Main rafters,** 2x4. **Hip rafters** 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Sub-Floors, 1x8 No. 1 Fir shiplap. **Red Bozin** paper for floor lining. **Wall Sheathing,** 1x8 No. 1 Fir shiplap and tar felt paper. **Best Grade Clear Red Cedar** siding. **Roof** shingles, Extra Clear 5/2-16 in. Red Cedar. **Inside doors** No. 122. **Choice** of any front door in Catalogue. For complete additional specifications see page 9.

Floor Plan.

The Ingleside will appeal to the discriminating builder as an ideal home. Its extreme simplicity implies character, quality and taste. A study of the interior reveals an arrangement that cannot be surpassed. Three bed rooms amply supplied with closets, all opening into living room or hall, which in turn connects living room and bath room. The dining room and living room are both extra large and are separated by a beautiful book-case colonnade. The kitchen is also of ample size and supplied with commodious cupboards and sink cabinet. The stair to basement is reached from the rear porch.

Height of ceiling, 8 ft. 3 in. **Floor joists**, 2x8. **Ceiling joists**, 2x6. **Studding**, 2x4. **Main rafters**, 2x4. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

24x34 Feet

Here is a bungalow that has been built a good many times, and in all cases has given complete satisfaction. With its charming exterior appearance and its ideal interior arrangement, it should be the pride of any owner. A glance at the floor plan will show you the reason for its popularity. The living and dining rooms are connected by a column opening of a large, square, colonial columns. The dining room, which is provided with ceiling beams, contains a buffet with mirror back and a cozy window seat. The centrally located bath room, the well lighted bed room and large kitchen complete this ideal plan. Please note convenient rear entry and combination basement stairs, with grade entrance.

Height of Ceiling, 9 ft. Floor joists, 2x8. Ceiling joists, 2x4. Studding, 2x4. Rafters, 2x4. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Freight Paid by Us to Your Station

Size
30x40 Feet

Floor Plan.

Our bungalows, contrary to the usual houses of this character, are so constructed as to be equally practical in either mild or vigorous climatic conditions. The model here pictured is no exception to the rule. The exterior is covered entirely with siding, while below the sill course wide bungalow siding is used. This design is somewhat different from the average. The broad exposed fireplace and chimney located in the front of house, add character and boldness to the design. Its corresponding porch pierce help to emphasize this characteristic. The floor plan is well worth serious study.

Height of ceiling, 9 ft. Floor joist, 2x8. Ceiling joist, 2x4. Studding, 2x4. Main rafters, 2x4. Valley rafters, 2x6. All No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on center.

Sub-Floors, 1x8 No. 1 Fir shiplap. Red Rozin paper for floor lining. Wall Sheathing, 1x8 No. 1 Fir shiplap and tar felt paper. Best Grade Clear Red Cedar siding. Shingles Extra Clear 5/2-16 in. Red Cedar.

FLOOR PLAN

Here we have the very latest in a four room Colonial Bungalow. The absolute symmetry of detail gives a perfect balance to a simple yet effective and beautiful exterior design. The brick terrace, flower boxes, bracketed hood and lattices give an attractive, if rather formal appearance.

The plan arrangement is very convenient and includes all of the most practical modern built in features. Note the large living room, easily accessible bath, grade entrance and breakfast alcove.

Note the "FOUR-IN-ONE" cabinet which we furnish for breakfast alcove. This is the last word in kitchen convenience. A large substantial breakfast table and ironing board with cloth holding edges, taper sleeve board with edge clamps, and a thoroughly arranged china closet, each ready for instant use and yet entirely out of the way when not wanted.

Height of ceiling, 8 ft. 4 in. Floor joist, 2x8. Ceiling joist, 2x6. Studding, 2x4. Main rafters, 2x4. Hip rafters, 2x6. All dimension No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on centers.

Sub-Floor, 1x8 No. 1 Fir shiplap overlaid with Red Rozin paper floor lining. Wall Sheathing, 1x8 No. 1 Fir shiplap overlaid with tar felt. Tar felt also between roof boards and shingles.

Inside doors No. 124 or 125. Front door, No. 109 or choice of any other front door in Catalogue. For complete additional specifications see page 9.

See pages 8 and 9 for what we furnish.

The Seattle is the latest development in the modern, five room "Colonial Bungalow." The exterior, while distinctively "Colonial," lacks much of the usual severity of this type of design, and is made very attractive and home-like by the careful use of well balanced details.

The Floor Plan is very compact and especial care has been taken in obtaining an arrangement which eliminates all extra steps. The large Living Room, extending across the entire front of the house, and the use of a Breakfast Room in place of the usual nook, are features for which there is an increasing demand. Attention is also called to the convenience of the central Hall which is accessible from the Kitchen as well as the Dining Room and Bed Rooms.

Height of ceiling, 8 ft. 4 in. **Floor joists,** 2x10. **Ceiling joists,** 2x4. **Rafters,** 2x4. All dimension lumber No. 1 Fir dressed one side and one edge. All joists, studding and rafters spaced 16 in. on centers.

Sub-Floor, 1x8 No. 1 Fir shi lap. **Red Bozin** paper for floor lining. **Wall sheeting,** 1x8 No. 1 Fir shi lap overlaid with tar felt. **Best grade cedar siding.** **Shingles,** Extra Clear 5/2-16 in. Red Cedar.

Inside doors No. 124 or 125. Choice of any front door in Catalogue. For complete additional specifications see page 9.

See pages 8 and 9 for what we furnish.

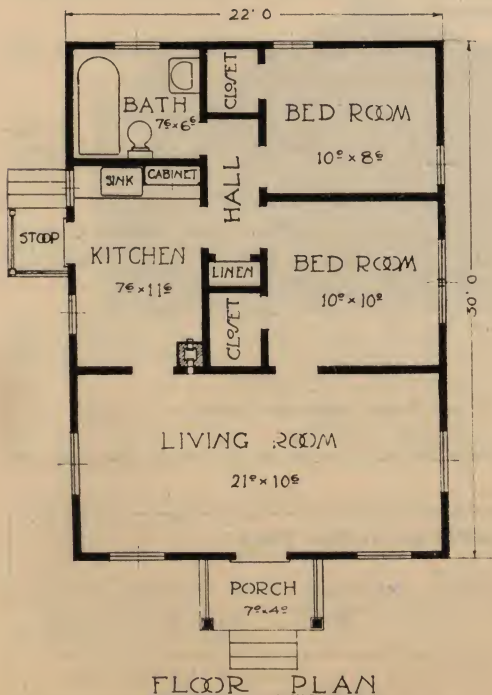

Plans complete for this house, \$6.00. Free plan offer on page 6.

"CARPENTERS PRONOUNCED THE MATERIAL EXTRA FINE"

Roseau, Minn., Nov. 3, 1919.

Dear Sirs:

Yours of October 10, 1919, received. In regard to the bill of material that you furnished me in 1917, will say that it was all O. K. and same was fully up to my expectation. The quantity was amply sufficient to complete house without purchasing any additional material. Had some material left over. The carpenters pronounced the material extra fine; could not get as good here from local dealers and your price was much cheaper.

Yours truly,

JOHN HALVERSON.

Combination Corn Crib and Granary

This is an ideal combination of corn crib and granary. The three bins are lined with 1x4 dressed and matched flooring and are perfectly tight and substantial in every way. This side of the building is covered with 1x6 drop siding. The corn crib side is covered with 1x4 beveled cribbing. The 9 ft. driveway makes useful storage for wagons or farm machinery.

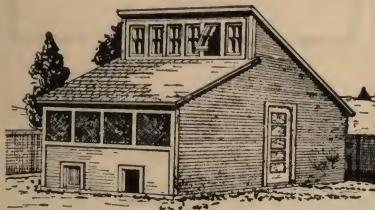

Can be furnished in any size and prices delivered at your station will be gladly quoted on request. When writing for prices, please give us width, length and height of side walls wanted, also furnish us with a pencil sketch of floor plan if wanted different from plan shown herewith.

Suggested Design for Hog House

alley and litter alley on the end. A system of strong movable partitions permits two or more pens to be converted into one. The unit design we have followed makes it possible to construct as large a house as required by addition of extra pens at either end.

Can be furnished in any size wanted. Write for prices delivered at your station, stating width and length of house wanted. If a floor plan is wanted different from plan shown herewith, then send along a pencil sketch of floor plan according to your ideas.

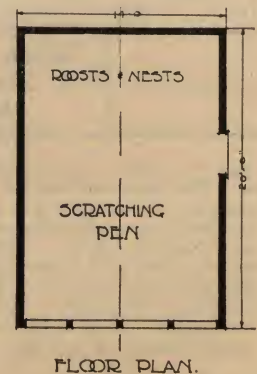

Chicken Houses

This will be found to be a dry and well ventilated chicken house. Light and ventilation are insured by the screen and sliding ventilation sash in front.

The designs and plans on this page are shown merely as suggestions for your convenience. We can furnish materials for any of these buildings in any sizes wanted. We invite your inquiries for delivered prices on lumber, shingles,

finish and mill work required for the construction of barns, granaries, hog houses, chicken houses, garages and other farm buildings. When requesting prices, always give us as much information as possible, such as width and length of building, height of side walls, number and location of doors and windows, and it would also be well to send along a pencil sketch of ground floor plan showing partitions, alleys, etc.

CONTRACTORS LUMBER SUPPLY COMPANY, SEATTLE, WASH.

UP-TO-DATE BARNs

The barns illustrated on the following pages have been designed by our practical architects with years of experience to meet the requirements of the modern farmer and stock raiser.

It is merely a matter of individual preference in making a selection of any one of the several designs shown. They are all rigidly constructed of the very best grade of No. 1 Fir Dimension lumber, which is now recognized the world over as the strongest and most substantial framing lumber that can be obtained. The plans have been worked out to obtain the greatest amount of useful space for the least cost.

General Specifications

Our barns are designed to set either on concrete or masonry foundations or piers. In ordering plans for barns shown on the following pages, please state the kind of foundation you expect to use. Our reason for asking this information is, that we supply a 4x6 for masonry or concrete foundation, and a 6x6 sill for barn set on piers.

All foundation and framing lumber in our barns is best grade of No. 1 Fir Dimension lumber, dressed on one side and one edge. (For sizes see detailed specifications below.) Roof sheathing is No. 1 Common Fir Boards dressed one side, random width and lengths laid solid. Siding is 1x6 No. 2 Clear and Better Fir drop siding, which is the best grade made. Roof is covered with best quality of Extra *A* Red Cedar shingles. Following is a detailed specification of sizes and kinds of materials used:

SILLS	-----4x6 for concrete foundation.
"	-----6x6 when set on piers.
STUDS	-----2x6, 24 inches on center.
PLATES	-----2x6, laid double.
RAFTERS	-----2x6, 24 inches on center.
MOW JOISTS	-----2x8, 24 inches on center for smaller barns.
"	-----2x10, 24 inches on center for large barns.
GIRDERS	-----6x8.
POSTS	-----6x6.
STALL PARTITIONS	-----2x12.
MANGER FRONTS	-----2x12.
MOW FLOOR	-----1x6 D&M Fir Flooring.
SIDING	-----1x6 best grade Clear Fir Drop Siding.
ROOF BOARDS	-----No. 1 Common Fir S1S, random widths and lengths.
SHINGLES	-----Extra *A* Red Cedar.
DOOR MATERIAL	-----4 in. Clear Fir Ceiling.
OUTSIDE FINISH	-----Best grade Clear Soft Fir.
TRACK BEAM	-----4x6 Select Common.
SASH	-----8x10, 4 lights.

Devils Lake, N. D., Oct. 25, 1919.

Contractors Lumber Supply Co.
Seattle, Washington.

Sirs:

I am enclosing two kodak pictures of my barn built from the lumber ordered from your company. I have been entirely satisfied in every respect with the dealings through your firm and sometime within the next year or two when we build a house perhaps we may be able to do business also.

I am pleased to have rendered this little service to your company and will look for a copy of the book for 1920.

Very truly yours,

B. A. OSBORNE.

If the retail lumber dealer offers to meet our price or comes anywhere near it, it will be at your expense. We sell you lumber at wholesale mill price and if the retail dealer offers to sell at our figure he is sacrificing all his profit. If he cuts his price isn't it only natural that he would try to make up for it in another way? Failing to get the price originally asked he will try to substitute poor grades and add a big bill for "extras."

CONTRACTORS LUMBER SUPPLY COMPANY, SEATTLE, WASH.

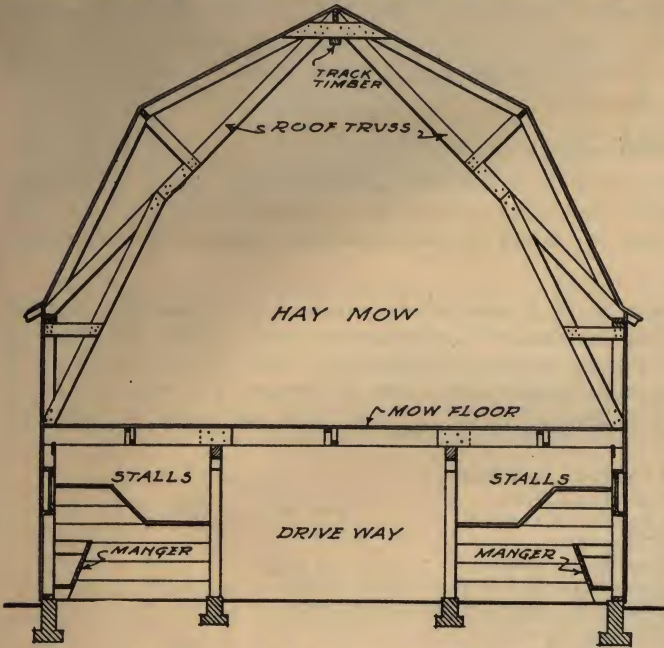

We have prepared at great expense complete plans, blue prints and specifications fully explaining every detail of the construction of the barns shown on following pages.

These plans, blue prints and specifications are absolutely free to our customers. All we ask is a deposit of \$3.00 to protect ourselves from curiosity seekers and the agents of retail lumber yards, who would order plans just to put us to trouble and unnecessary expense. When material is purchased from us, we allow you credit for the \$3.00 deposited, so the plans will not cost you anything. We furnish with the plans a complete set of specifications, and material list describing all material and its location in the building, so that anyone having a reasonable experience in building construction will have no trouble in erecting the barn.

SPECIAL PLAN OFFER

Realizing that no two farmers may need the same size and arrangement of barn, we have established a special barn plan department, which is also free to our customers.

In case you do not find a barn plan in this book which conforms to your ideas, or one than can not be made to suit you by making slight alterations, simply send us a rough sketch and description of the plan you want to use, stating the width, length, height of studs, kind of roof construction, and any other information you can think of, together with a deposit of \$5.00, on receipt of which we will furnish you with an expert architect's preliminary blue print sketch of barn, drawn to scale, consisting of floor plan, showing location of stalls, mangers, bins, stairway, etc.; and a sectional framing elevation showing construction and style of roof

SECTION OF GAMBREL ROOF BARN

The above cut illustrates the construction of truss for our Gambrel roof barns. The principal rafters, the sway braces, collar ties and other braces are of heavy plank, the size depending upon the size of barn, and are all doubled, two pieces of each being used where only one piece of each is visible in section above. This makes a doubly strong truss, and it will withstand the heaviest strain. From grade line to mow floor, the above cut shows a typical construction found in all our barns.

and all structural features. This preliminary sketch gives you a good outline of your ideas worked out in a practical way. This will be sent to you for your approval, corrections and further suggestions. You can then return the sketch to us with your corrections noted, together with \$5.00 additional, and we will make you a complete set of blue print plans. These plans consist of floor plan, sectional elevation, end elevation, side elevation, and other details. With these plans we will send you our guaranteed material specification estimate, describing the quality, kind and size of all material to be furnished, also quoting you a **GUARANTEED PRICE F. O. B. Cars**, your station. This entire outfit will cost you only a temporary deposit of \$10.00 which will be refunded when material is purchased from us. You will thus get complete plans according to your own ideas absolutely free.

NO MONEY DOWN are the terms we offer. We take all the risk. Shipments made subject to your inspection. We let you be the judge. See our terms of sale on first pages of this catalogue.

"I SAVED \$200 IN BUYING FROM YOU"

Contractors Lumber Supply Co.
Seattle, Washington.

Colony Bay, Montana, Dec. 5, 1919.

Gentlemen:

In reply to your letter am sorry to say that I have no picture of my barn. I have the best barn in this part of the country and the lumber that I got of you was better than I could have got at any of the yards here; besides I saved \$200.00 in buying from you. I will send you photo when I have some made.

W. B. STURGILL.

CONTRACTORS LUMBER SUPPLY COMPANY, SEATTLE, WASH.

Barn Design No. 180

The above cut illustrates the popular and practical Gambrel roof barn which is a favorite with a big majority of barn owners.

The floor plan shown on this page presents a practical and convenient arrangement which meets with the demand for a combination horse and cow barn. This arrangement may be modified to suit the special needs of the individual farmer, without materially increasing the cost.

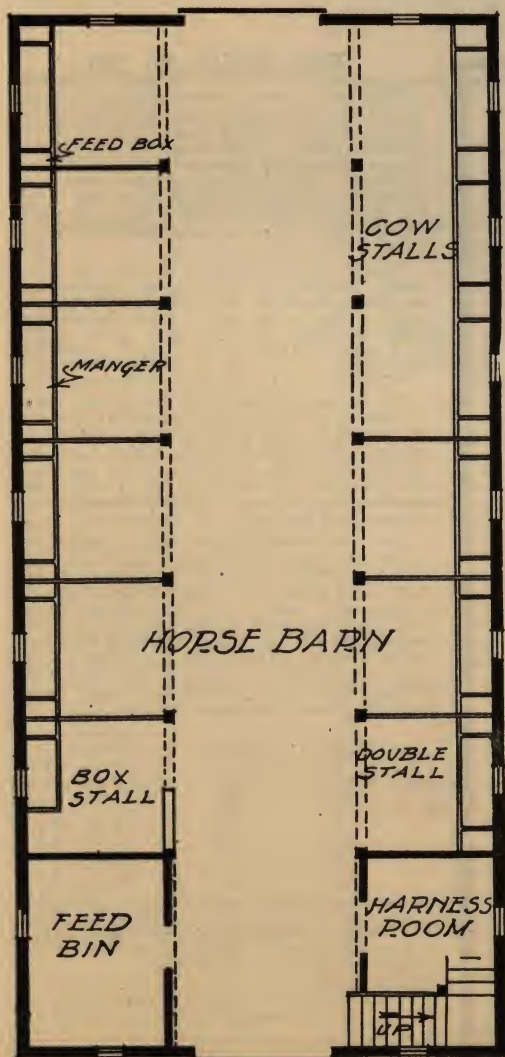

Below you will find a list of stock sizes for which blue print plans and specifications can be furnished by return mail. For sizes other than shown below, we will furnish blue print plans and specifications in accordance with our SPECIAL PLAN offer on page 70.

Prices on any of these barns delivered at your station will be cheerfully quoted on request. In asking for quotations, please state size of barn, design number, height of studs and floor plan number. If changes are desired in floor plan, send a rough pencil sketch showing arrangement and size of stalls, etc.

Our delivered prices will always include guaranteed sufficient quantities of all necessary lumber, shingles, finish and barn sash to complete the barn in accordance with our blue print plans and specifications, excepting plank flooring for stalls. If plank flooring is wanted, please so advise, and a separate price will be quoted on same. Specification of material we furnish for these barns will be found on pages 69 and 70.

Floor Plan No. 185

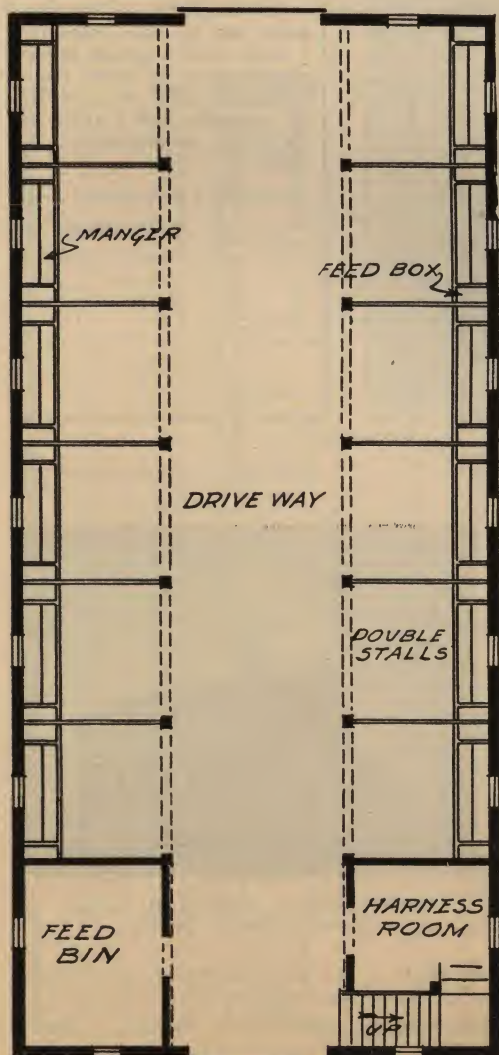

Barn Design No. 210

This Gothic type of barn roof is a slight variation from, and we believe an improvement over our circle roof design No. 200, shown on page 75, which proved so popular last year. The Gothic roof provides for increased mow space free from obstructing supports of any kind.

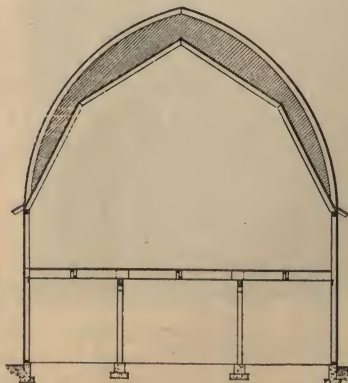

Experience has shown that this type of roof possesses greater wind resisting qualities and is therefore less liable to damage from high winds than any kind of roof heretofore designed. We are advised by a customer in North Dakota to whom we sold a barn of this type last year, that in a recent cyclone which traversed his part of the state, not one barn with a Gothic or circle roof was destroyed, while dozens of barns with the old style roofs were utterly demolished.

Floor plan shown is merely suggested as a practical and convenient arrangement for a horse barn. This plan may be modified to suit special needs without materially adding to cost.

Prices on barn of this design in any size delivered at your station will be cheerfully quoted on request. In asking for quotations please state size of barn wanted, and if change is wanted in floor plan, send us a pencil sketch of your requirements.

Floor Plan No. 210

PLANS COMPLETE for barn of this design in any of stock sizes listed on page 71. **\$3.00**

Other sizes furnished in accordance with our **SPECIAL BARN PLAN** offer on page 70. Free plan offer on page 70.

In above section the shaded part shows additional mow space in this type of roof as compared with Gambrel roof.

NORTH PARK HEREFORD RANCH
HEREFORD CATTLE
 REGISTERED AND HIGH GRADE BREEDING STOCK
 J. H. DICKENS

WALDEN, COLORADO

May 24, 1919.

MEMBERS: I. W. Baker & Sons,
 Sycamore,
 Ill.

Gentlemen:

Kindly pardon delay for not answering your letter of April 28th sooner, but have been so busy with the sale which was held May 12th and 13th.

The barn has been perfectly satisfactory in every way. It is 50 x 80 feet with twenty-four stalls on one side for horses and the cow barn and machine shed on the other side. It holds 150 tons of hay, has a self supporting roof, the shingles lay nearly flat and have given no trouble.

You could obtain more detailed information about this barn from the Contractors Lumber Supply Company of Seattle, Washington, from whom I bought the material to build it. Would be glad to give you more definite specifications, but they are at the ranch, and I do not remember the details of construction.

Trusting the above information may be of assistance to you, I am

Very truly yours,
J. H. Dickens

JHD:b

Walden, Colo.,
 June 23, 1919.

Contractors Lbr. Sup. Co.
 Seattle, Wash.

Gentlemen:

Regarding your letter of June 12th, wish to state that you may use my letter to I. W. Baker & Sons, of May 24th in your 1920 catalogue.

I might add that my barn has been entirely satisfactory, and I think it the only barn for this country.

It is very much out of the ordinary, both in appearance and in hay capacity. I have had a great many compliments on same from ranchmen from all parts of the country, and I think it quite an advertisement in itself.

Yours very truly,
 J. H. DICKENS.

Circle roof barn of Mr. N. V. Anderson, Cowles, Nebraska, under construction.

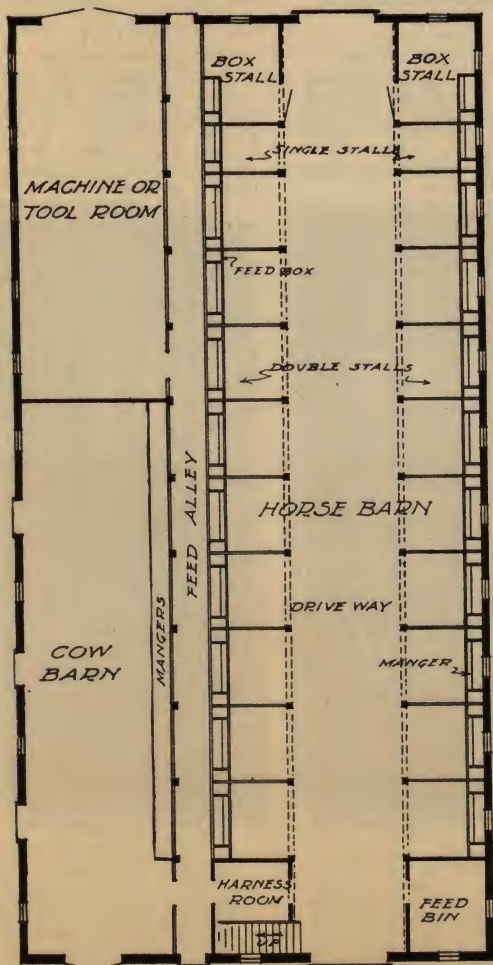

Circle roof barn of Mr. J. P. Walde, Warwick, North Dakota.

We show above photograph reproductions of circle roof barns built by our customers from plans and material supplied by us. The circle roof and Gothic roof is the latest thing in barn construction. The rafters (or bents) are furnished by us band sawed to proper radius.

CONTRACTORS LUMBER SUPPLY COMPANY, SEATTLE, WASH.

Barn Design No. 200

Floor Plan No. 200

Width	Length	Height of Studs	Floor Plan
30	60	14 ft.	No. 180
50	100	14 ft.	No. 200

Write for prices delivered at your station.

A great many farmers who have built this design with our material have told us that it is by far the most attractive and most practical barn that can be built. The only reason why there are fewer of these barns built than the other designs shown is because the construction of the roof is not understood. It is thought to be very difficult and expensive. This is not the case. The construction is very simple and is fully explained and shown in our complete working blue print plans and specifications which are free to our customers.

There is no tendency for the roof to spread necessitating the use of heavy trusses since the bearing is directly down upon the studs. The mow of this barn is all space and the noticeable feature is the absence of trusses.

The roof is shingled over its entire surface. Rubber roofing is supplied to extend well down on the sloping sides.

This plan as shown is 50 feet by 100 feet and has stall space for 38 horses, not including the two box stalls. If the machine or tool room is not needed the partition may be omitted, making room for 22 cows.

This style of roof is a decided favorite among our customers. The extra cost of material over the Gambrel roof is very slight and we know it to be a fact that contractors who understand our proposition of milling the rafters at our mills have offered to build the larger sizes for as much as \$40.00 less than a barn of the same size with the Gambrel roof.

There is lots of light and plenty of ventilation. The side doors to cow shed are specially made dutch doors so that the top half may be opened and the bottom left closed.

Any number of slight changes may be made in the floor plan, without increasing the cost.

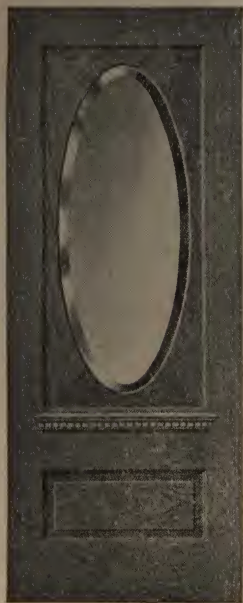

We guarantee to furnish all lumber, shingles, rubber roofing and millwork in sufficient quantities to complete each barn according to our plans and specifications, except plank flooring for stalls, which is extra. Price on plank flooring will be quoted on request. Complete specifications of all material we furnish for these barns will be found on pages 69 and 70.

PLANS COMPLETE for barns of this design **\$3.00**

Price complete, each ----- \$8.00

Queen Anne Windows

The above illustrates the Queen Anne style of windows which are very popular in bungalows or cottages. The cut up top relieves the plain effect of the ordinary two light window and adds a touch of beauty to any home.

For prices on these windows, take the price of an ordinary two light on page — as a basis, and add 25c for each small light in Nos. 162, 163, 164 and 165, and 12c for each small light in all other designs.

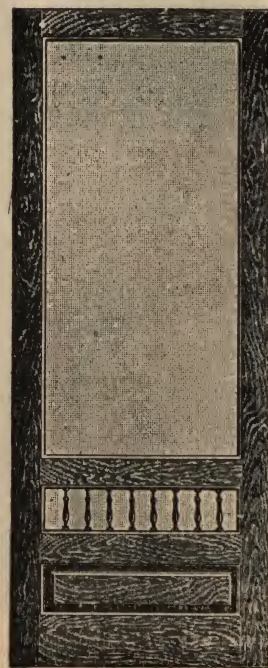

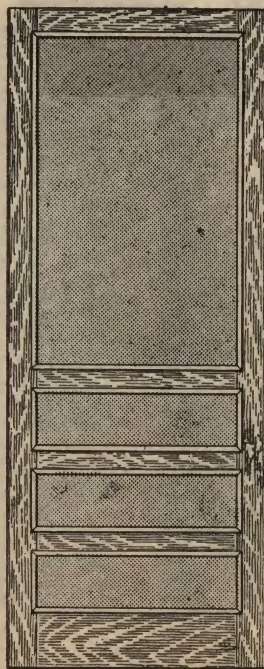

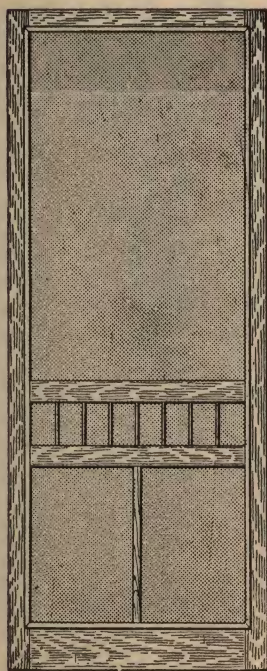

COMBINATION STORM AND SCREEN DOOR

Changed in a minute from storm to screen door. No tools necessary. Door is furnished with both sash and screen as shown. Double strength glass, galvanized wire.

Size—	Price

PANELED WAINSCOTING

Paneled wainscoting and beamed ceilings add a degree of beauty and refinement to the modern dining room, living room, library, which no other branch of architecture has produced. A paneled dining room with plate rail costs so little that the particular home builder can not afford to leave out this added decorative feature.

The above cut illustrates one of the many beautiful designs that are possible with the use of our wainscoting material. Note sectional cut showing manner of construction.

Prices for panels of different sizes are shown in list on the left. Prices per lineal foot for other wainscoting material follow:
Slash grain battans 1/2 x 3 in.....\$.04
Top rail 3/4 x 4 1/2 in. rabbet......05

COLONNADE NO. 465

Price Complete with Jambs and Trim,
\$52.50.

Our Colonnade No. 465, shown on this page, is a masterpiece in workmanship and design. The pedestals are unusually high, which allows ample space for book cases (or china closets), and drawers as shown. The side which is fitted with the beautiful leaded art glass doors may be faced into the living room and used as book cases, or into the dining room where it will serve as a china closet.

This Colonnade is made from Clear Old Growth Soft Yellow Fir, especially selected for the beauty of grain, and every piece of material used in its construction is absolutely flawless. The cut will give you only a faint idea of the marvelous beauty of Old Growth Yellow Fir Finish. It must be seen to be fully appreciated.

In ordering, give width and height of the rough opening.

The trim for this Colonnade will be supplied in patterns to match door and window trim in the house.

No. 466

Here is another of our artistic Colonnades with leaded glass doors for book cases or china closets. Cut shows only one-half of Colonnade.
Price, complete with Jambs and Trim.....\$52.50

COLONNADES NOS. 462 AND 464

These Colonnades are very popular and are two of our best sellers. They are made of the same high-grade of selected materials as our other Colonnades shown above. The trim for all Colonnades will be furnished in patterns to conform to other inside trim in your house. Both of these designs are same price. Complete with Jambs and Trim.....\$33.00

Kulm, N. D., June 30, 1917.
Contractors Lumber Supply Co.,
Seattle, Wash.

Gentlemen:

The car of lumber I ordered from you has been received, and I am glad to say that it is of first-class quality—far better than I can get from local lumber dealers out here, and at much lower price. I have forwarded you the money as instructed.

Yours very truly,
FRANK CARLSON.

"LUMBER WAS ALL RIGHT"

Greeland, N. D., May 20, 1915.

Contractors Lumber Supply Co.,
Seattle, Wash.

Gentlemen:

I have received and unloaded Car No. 102922 and have notified my bank to settle with you. The lumber was all right.

One of my neighbors, Mr. R. Emerson, is thinking of building a barn. You might write to him. He was here and looked at my lumber, and he thought it was very fine.

Yours truly,

GILBERT JACOBSON.

CONTRACTORS LUMBER SUPPLY COMPANY, SEATTLE, WASH.

DIRECT FROM SAW MILL TO ACTUAL CONSUMER

This means that you can buy your material without having to pay profits to the middleman. Who are the middlemen in the lumber business? The jobber, the wholesaler, the broker, or commission man and the retail dealer. All of these middlemen make a profit, and their profit is paid by the actual consumer. These dealers all sell more or less on credit, and that means a certain number of bad accounts. They have to add a certain percentage to the price to make up for the man who doesn't pay. We sell for cash only and do not have to ask you to help pay another man's debt.

Putney, S. D., Jan. 20, 1919.
Contractors Lumber Supply Co.,
Seattle, Wash.

Dear Sirs:—I must let you know that I am highly satisfied and pleased with my new house. The neighbors are all asking how I had it done so cheap, and the answer is that I had no middlemen's profits to pay. I am enclosing picture of the house and my family.

With thanks to you, I am,
Yours truly,
A. D. Holland.

CONTRACTORS LUMBER SUPPLY Co.

SATISFIED CUSTOMERS

are the best evidence we can offer in support of the statements made in this book. It is but natural that we should speak highly of our material, but this in itself would hardly be convincing to the prospective buyer, who may have previously found from experience that the unsupported word of the dealer is not always to be relied upon.

"BETTER MATERIAL FOR LESS MONEY" has been the watchword of this company since it was organized ten years ago for the purpose of selling lumber and other building material direct to consumers. We have honestly endeavored to live up to this motto. It has been our policy to give our customers absolutely the best material that money can buy.

It has been our belief that it was possible to furnish the very best grade made at prices much lower than are charged by the average yard for second grade material. We have hundreds of letters in our files from customers who tell us that this is a fact.

Throughout this book will be found many such letters. Last summer we received a letter from a customer in South Dakota, one paragraph of which reads as follows:

"Lumber looks nice, and our local lumber yard manager who went down to the station to look at it, said: 'WHERE DO THEY GET SUCH LUMBER; WE CAN'T GET IT.' I got my neighbor, Mr. Mitchel, to order his barn lumber from you, and I have no doubt but that you will secure other customers in this neighborhood. My neighbors who helped me haul out lumber pronounced it fine."

Another customer in Colorado wrote under date of October 29th, 1918:

"I am pleased with my building. The lumber you sent is the finest ever shipped into our town."

Both these letters came to us unsolicited, and names and addresses of the writers will be furnished to anybody who is interested.

IT IS TO YOUR OWN INTEREST TO GET IN TOUCH WITH US BEFORE YOU BUY YOUR MATERIAL. LET US CONVINCE YOU THAT WE ACTUALLY DO GIVE

BETTER MATERIAL FOR LESS MONEY
